FEATURES

Locking & non-locking options available

Powered & non-powered options available

Solutions for XCover Pro with case, without a case, and with an OtterBox uniVERSE case

SAMSUNG XCOVER PRO & FIELDPRO

Both the Samsung XCover Pro & FieldPro take some of the best features of current Tab Active tablets by introducing the pogo-pad technology for charging purposes. RAM® supports these kinds of innovations with pogo-pin enabled powered docks. Of course, with a non-powered option available, the RAM® EZ-Roll'r™ system supports the Samsung XCover Pro without a case as well as an option for OtterBox uniVERSE-wrapped XCover Pros. Simply drop the device into the powered cradle and the aligned pogo-pins to pogo-pads instantly starts charging.

INTELLISKIN® & INTELLISKIN® NEXT GEN

IntelliSkin® is a protective sleeve for phones and tablets featuring GDS® Tech™ with pogo pin technology and military-grade drop protection. With an integrated GDS® connector molded directly into each skin and ruggedized docking contacts on each skin's exterior, IntelliSkin® is designed to extend the life of devices by preventing damage to the charging port from repetitive docking. The IntelliSkin® Next Generation protective sleeve includes all the great features of the original IntelliSkin® while adding several enhancements. An insert molded redesign of the skin combines a hard plastic shell with soft, shock-absorbing rubber. Ruggedized contacts for repetitive docking remain on the exterior, but are now flat to collect less dirt and allow for easier cleaning. An integrated USB Type-C connector at the bottom of the skin allows for device charging even when you don't have a GDS® Dock™ available.

RAM-GDS-SKIN-SAM54-NG

Interchangeable Top Cups

GDS® VEHICLE DOCKS™

GDS® Vehicle Docks™ with GDS® Technology™ offer a universal charging platform for any device wrapped in an IntelliSkin® sleeve. IntelliSkin® offers drop protection and uses ruggedized external contacts to allow for repetitive docking, with no need to deal with charging cables. The main advantage of GDS® Vehicle Docks™ is the interchangeable top and bottom cups. Simply switch out either cup depending on the device you plan on docking instead of purchasing new docks. New top cups for IntelliSkin® Next Gen-wrapped devices feature universal positioning marker for a clean docking experience

RAM-TC-SAM29U

RAM® Tough-Case™ with USB Type A for Samsung Tab Active3 and Tab Active2

FEATURES

Ideal for ELD use

Oversized strain relief protects cable connection

Open enclosure on front and back allows heat to flow from device.

RAM® TOUGH-CASE™

The RAM® Tough-Case™ is a rugged two-piece enclosure with a built-in coiled power cable that tethers the device inside of any vehicle. This case allows you to create a hardwired connection to the tablet using a custom USB Type-C connector, with a stretch of up to 7 ft which offers maximum tablet mobility while staying connected. Your connection will remain secured and protected with the use of oversized strain relief built into the RAM® Tough-Case™ making this the ideal ELD mounting solution for current Samsung tablets.

Keeps tablet physically tethered to the vehicle

GDS® Ecosystem™ Vehicle Bundle with
Monitor, Keyboard & Phone Mount

SAMSUNG DEX IN-VEHICLE

RAM® Mounts has partnered with Samsung to support the Samsung DeX platform by enabling the system in-vehicle. Samsung DeX allows you to consolidate your workflow through a Samsung phone while RAM® Mounts allows you to transform your vehicle into a mobile workstation with the help of familiar peripherals that emulate a desktop experience.

The GDS® Ecosystem™ Bundle is the all-in-one solution for introducing Samsung DeX into your workflow. This bundle includes a GDS® View™ 13.3" touchscreen monitor, a GDS® Keyboard™, display bracket, universal vehicle mount, phone mount, and hardwire chargers to transform your vehicle into a mobile office. Simply insert your DeX-enabled Samsung phone and connect your device to the workstation so you can work on the go.
