

TA-14 Microphone Windscreen Mounting Guide

This document describes the mounting procedure of the TA-14 Microphone Windscreen for the Turbine Compact Station series TCIS, TCAS, TCIV. The TA-14 functions as a screen for the microphone on the Turbine Compact station in order to protect it against wind noise.

Item Number	Type	Item Name
1008140140	TA-14	Microphone Windscreen for Turbine Compact Station

To mount the TA-14 onto the Turbine Compact station:

1. Clean the bottom of the station with an appropriate cleaning solution (a 50/50 mixture of isopropyl alcohol and water is recommended), and dry the surface.
 2. Remove the cover tape to expose the adhesive on the TA-14.
 3. Mount the TA-14 onto the bottom of the station using the two screws as indicated.
- ⓘ *If you have an older version of the station without the two screw holes, the TA-14 can be mounted with adhesive. The recommended temperature for mounting with adhesive is 18-35°C.*
4. Press the adhesive side firmly onto the bottom of the station, making sure to align the hole on it with the microphone aperture.
