

How to Modify Audio Output in GV-IPSC10

The GV-IPSC10 network speaker has a 2P phoenix terminal for either connecting a second speaker (to Speaker) or importing audio files (AUX IN). By default, the function of connecting another speaker is enabled. To change the function to importing audio files, follow the steps below.

1. Remove four screws on the cover of the speaker to open it.

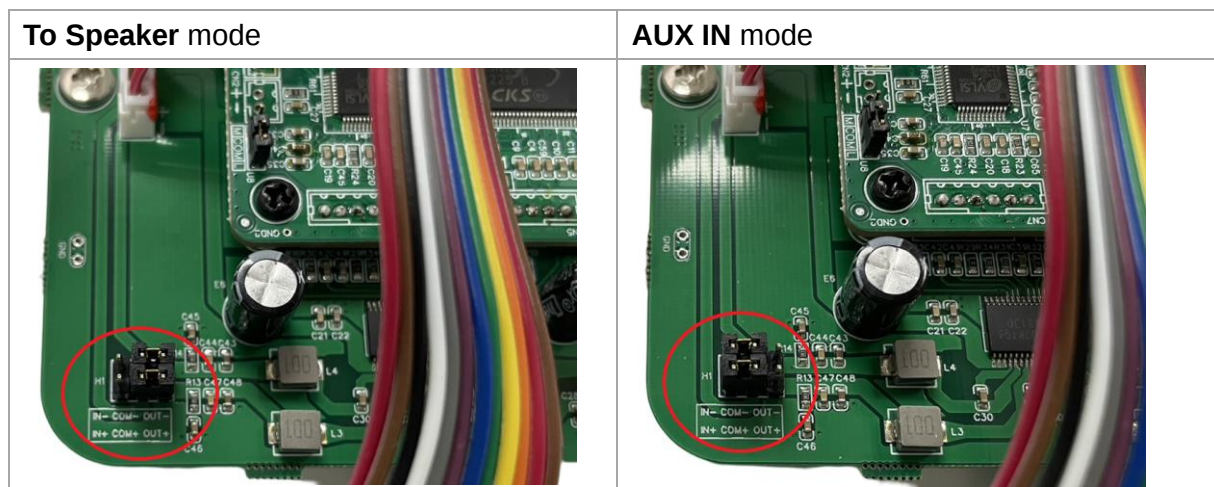

2. Open the cover.

3. Move the two jumpers from left to right for AUX IN mode

4. Put the cover back on using four screws.
