FORTIMONITOR: SD-WAN SYNTHETIC TRANSACTION MONITORING (STM)

SOLUTION BUNDLE	SKU LICENSE	SD WAN STM BUNDLE
SD WAN STM Application Monitoring Retrieves NTT, SRT, DNS lookup time, HTTPS response time, and RTT against custome & OTB applications across all SD WAN connections to measure application reachability & performance.	10-Pack	FC1-10-MNCLD-672-01-12
	25-Pack	FC2-10-MNCLD-672-01-12
	500-Pack	FC3-10-MNCLD-672-01-12
	2000-Pack	FC4-10-MNCLD-672-01-12
	10,000-Pack	FC5-10-MNCLD-672-01-12

CONSIDERATIONS FOR BRANCH AND HUB SELECTION

Selecting the Branch or HUB devices depends on multiple factors that are unique to each deployment. Speak with a Fortinet specialist for assistance selecting the right devices for your environment.

Below are the most common selection criteria and some commonly selected Hub devices, based on deployment sizes (for reference purposes only).

Branch Selection

- Security requirements
- Number of users
- Throughput
- Interface connectivity
- Wireless requirements
- Redundancy (WAN, Power, IPsec Tunnels, Device)

HUB Selection

- Security requirements
- IPsec throughput
- Total IPsec Tunnels
- Interface connectivity
- Redundancy (Ports, Device, Power, Intra-site)
- AC or DC Power

Hub Sizing Examples (Reference Only)

- Up to 500 Sites (400F-600F)
- Up to 2,000 Sites (1000F-1800F)
- Up to 5,000 Sites (2200E-2600F)
- Up to 10,000 Sites (3000F-3700F)
- Beyond 10,000+ Sites (3960E-4800F)

NSE TRAINING AND CERTIFICATION

FCSS - SD-WAN Training and Certification	Ordering Information	
Learn about common SD-WAN deployment scenarios using the Fortinet Secure SD-WAN solution. Explore different situations, from a single enterprise site to multiple data center environments, that will help you to enhance and troubleshoot SD-WAN deployments.	SKU	DESCRIPTION
	FT-SD-WAN	Instructor-led Training - 4 days
	FT-SD-WAN-LAB	On-demand Labs (self-paced)
	NSE-EX-FTE2	Certification Exam
Course Description For more information about prerequisites, agenda topics, and learning objectives, please refer to the course description at https://training.fortinet.com/local/staticpage/view.php?page=library_sd-wan .		

FREQUENTLY ASKED QUESTIONS

Is there an extra license to use SD-WAN with FortiGate?

No, SD-WAN is a feature included in FortiOS at no additional cost. Fortinet recommends purchasing security subscription services as necessary and utilizing a FortiManager for central management.

Are there any bandwidth licensing or restrictions?

Fortinet does not charge for bandwidth usage and you are free to use as much as the box will physically support.

Which FortiGate models can be utilized as a SD-WAN Hub?

Any FortiGate model can be utilized as an SD-WAN Hub or Branch. This guide provides guidance on Branch and Hub models based on common deployment use cases.

Why is "Maximum IPSec Tunnels" omitted for Branches?

IPSec phase1 interfaces have no hard limit and are only limited by system memory. Our tests have shown to support several hundred tunnels on even the smallest box but varies based on many factors.

How is Overlay-as-a-Service priced?

The licensing model is per-FortiGate device. This means that each FortiGate that participates in the SDWAN overlay region will need an individual device entitlement and registered to the same FortiCloud account. No other purchase or license is necessary. Upon activating the service from the OaaS portal, FortiGate HUB devices will be assigned and allocated for the SDWAN overlay region.

How is the SDWAN Underlay Monitoring service priced? Is a FortiManager license required?

SDWAN Underlay Monitoring is licensed per-FortiGate and no additional licensing is required. FortiManager allows you to execute and monitor the speed test service from a remote FortiGate device with the proper license.

How is FortiMonitor Synthetic Transaction Monitoring (STM) priced?

A "Pack" refers to the total number of FortiGates that will integrate with FortiMonitor OnSight agents. Agents integrate with SD-WAN to monitor all available WAN underlay links. There is no licensing limits on the number of WAN underlay links to be monitored.

Example: 10-Pack includes 10 FortiGates, 25-Pack includes 25 FortiGates

How is "Threat Protection" measured and what does it include?

Threat Protection performance is measured with Firewall, IPS, Application Control, URL Filtering and Malware Protection enabled, Enterprise Mix traffic

What does the "Unified Threat Protection" license include?

The Unified Threat Protection license includes: IPS, Advanced Malware Protection, Application Control, Botnet DB, Mobile Malware, Outbreak Prevention, Web & Video Filtering, Cloud sandbox, Secure DNS filtering, AntiSpam Service, and 24x7 support.

Where could I find the maximum values for SD-WAN components, such as rules and performance SLAs?

The maximum system values for all FortiGates can be found here:

<https://docs.fortinet.com/max-value-table>

What do I need for Zero Touch Provisioning (ZTP)?

ZTP can be accomplished a number of different ways. For most deployments, we recommend purchasing FortiDeploy (FDP-SINGLE-US) with your purchase order. FortiDeploy will link the serial numbers in your order to your FortiCloud account. A FortiManager IP address can be assigned to your devices automatically so they retrieve their configuration automatically from the FortiManager of your choice.

Do I need to install a GSLB license on FortiGate?

No additional license is required on the FortiGates. However, the FortiGSLB license should be registered on the same account as the one with the FortiGates.
