### Mounting

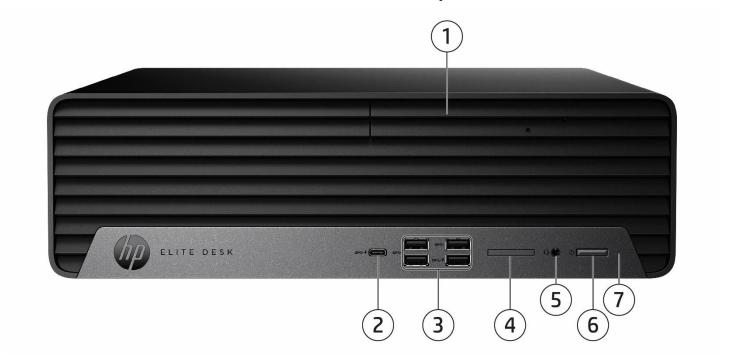

Support for

- Dual VESA Sleeve V4 Standalone
- Ouick Release Bracket
- B200/B300/B500/B550/B560/B600 Mounting bracket
- Integrated Work Center Stand
- HP Single Monitor Arm
- 1. Fiber NIC 1Gbps cards would not be available in some selected Europe countries and Korea. And does not support PXE boot.
- 2. Sold separately or as an optional feature.
- 3. Must be configured at time of purchase.
- 4. When a 2nd M.2 SSD/HDD is installed after purchase in 65W CPU SKU configs, then After Market Option SATA Drive Bay Kit v2 (13L70AA) is needed.

*Features* 

#### **AT A GLANCE**

- Choice of four form factors: Tower, Small Form Factor, Mini Desktop and All-in-One.
- Latest commercial class Intel® Q670 chipsets supporting Intel® Core™ 12th, 13th and latest 14th Generation processors, featuring both integrated Intel® UHD Graphics and optional discrete graphics.
- Choice of Windows 11 Professional, Windows 11 Home, and FreeDOS.
- Hardware feature highlights:

#### 1. All Form Factors:

- Up to 128 GB DDR5 Memory, Max Speed up to 4400 MT/s for TWR/SFF; Up to 64 GB DDR5 Memory, Max Speed 5600 MT/s for Mini/AiO with selected Intel® Core™ 14th Gen i5, i7 & i9 Processors.
- Integrated 10/100/1000 Ethernet Controller, optional Wi-Fi 7, Wi-Fi 6E, Wi-Fi 6 (802.11ax) and Wi-Fi 5 (802.11ac) and Bluetooth®.
- RAID 0 and RAID 1 support.
- TUV Ultra Low Noice Certification on selected configuration.

#### 2. TWR/SFF:

- Multiple video outputs via 2 standard video ports, optional Flex IO and discrete graphics.
- Rear Flex IO choices of Serial, VGA, DisplayPort, HDMI & USB Type-C<sup>®</sup> with DisplayPort™ Output.
- Total 11 USB ports including 10 USB-A and 1 USB Type-C<sup>®</sup>

#### 3. Mini:

- Support up to 8 monitors via two standard DisplayPort™ 1.4a ports, one standard HDMI 2.1, and a configurable Flex I/O port for discrete Nvidia 3050Ti graphic card (3 mini-DisplayPort™ ports and 1 micro-HDMI video port) with all 4K resolution.
- Configurable FlexPort which provides the following choices: HDMI 2.1, Serial, VGA, DisplayPort™ 1.4a, or USB Type-C® with DisplayPort™ 1.4 with Power Delivery, Thunderbolt 3 withUSB4.0, Dual USB Type-A and Intel I226V-T1 2.5G LOM.
- 2nd FlexPort available for configuration with the following ports: mini-DisplayPort™ ports and micro-HDMI (when configured with discrete graphic card), Serial, Dual USB Type-A, and 2nd external antenna.
- Single cable scenario support when configured with FlexPort USB Type-C® with DisplayPort™ 1.4 with Power Delivery via selected HP monitors.

#### 4. AiO:

- Support up to three (3) M.2 storage slots for a maximum of 6TB PCIe<sup>®</sup> NVMe<sup>™</sup> M.2 SSD.
- Audio by Bang & Olufsen with HP Noise Cancellation Software, HP Dynamic Audio, and HP Sound Calibration.
- Enhanced video conferencing experience with HP Auto Frame, HP Auto Lock and Awake, HP Keystone Correction, Auto Camera Select, and Backlight/Lowlight Adjustments.
- Multicamera software support of an additional webcam (optional) (sold separately).
- HP Eye Ease TÜV Certified Integrated Low Blue Light panels.
- Optional 27" QHD touchscreen with micro-edge bezel.
- Optional 5MP or 16MP swivel camera with options for Temporal Noise Reduction, IR sensor, Time-of-Flight sensor, and Color Light sensor
- HDMI-in enabled Monitor Mode which disassociates panel from CPU for use as strictly display only.

### Sustainability:

- 1. ENERGY STAR® certified. EPEAT® Climate+ registered where applicable.
- 2. High efficiency energy saving power supply.
- 3. Recycled metals, low halogen & ocean bound plastics used in materials.
- 4. 100% sustainably sourced and recyclable package.
- 5. TCO edge for AiO & TCO 9.0 for TWR/SFF/Mini.

### **Features**

- Software, Security & Manageability
  - 1. Default vPro Enterprise with vPro capable Processors and WLAN card
  - 2. HP Wolf Security for Business includes HP Sure Click, HP Sure Sense and HP Sure Recovery
  - 3. HP Tamper lock
  - 4. HP Connect
  - 5. HP BIOSphere
- Protected by HP Services, including limited warranties up to 1-1-1(terms and conditions vary by country; certain restrictions and exclusions apply); Care Packs are available up to 5 years Next Business Day Onsite Hardware Support.
- Power consumption of Desktop Mini PC varies per configuration, for the best user experience, please connect DC Jack while using USB-C® cable via Type-C® port in the rear side of the platform.

<sup>1.</sup> Intel® Turbo Boost technology requires a PC with a processor with Intel Turbo Boost capability. Intel Turbo Boost performance varies depending on hardware, software and overall system. See http://www.intel.com/technology/turboboost for more information.

<sup>2.</sup> Multi-core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering, branding and/or naming is not a configuration measurement of higher performance.

<sup>3.</sup> Intel vPro® requires Windows 10 Pro 64 bit or higher, a vPro supported processor, vPro enabled chipset, vPro enabled wired LAN and/or Wi-Fi 6E WLAN and TPM 2.0. Some functionality requires additional 3rd party software in order to run. Features of vPro® Essentials and Enterprise vary. See http://intel.com/vpro.

### **STORAGE**

NOTE: Starting November 1, 2023, HP PCs with Windows require Windows to be installed on SSD.

HDD can only be configured as additional data drives and not as the boot drive.

NOTE: SATA RAID and NVME RAID can be supported simultaneously when customers configure on their own.

DDR5-5600 (Transfer rates up to 5600 MT/s), Max 64 GB, 2 SO-DIMM	х			X

<sup>\*</sup>NOTE: Memory modules support data transfer rates up to 4800 MT/s; system speed up to 4400 MT/s, following Intel's design guideline. Actual data rate is determined by the system configuration.

<sup>\*</sup>NOTE: All memory slots are customer accessible / upgradeable.

128GB (4 x 32GB)		Х	Х	

<sup>\*</sup>NOTE: System architecture design is 2 DIMMS per channel and the population starts from the furthest memory slot from the processor.

<sup>\*</sup>NOTE: Symmetric configurations are required for the 2 DIMMs within the same memory channel.

<sup>\*</sup>NOTE: To achieve optimal memory speed, HP strongly recommends using identical memory modules (e.g., same capacity, same part number and from the same supplier) within the same memory channel

<sup>1.</sup> Only available with Intel Core 14<sup>th</sup> Gen processors.

NOTE: All HP G9 Minis and AiOs support Wi-Fi 6E. HP 800 G9 TWR/SFF desktops with Intel® 13th Gen CPUs support Wi-Fi 6E.

**NOTE:** The HP 800 G9 TWR/SFF requires Intel® Core 13<sup>th</sup> and 14<sup>th</sup> Gen processor to support Wi-Fi 6E and requires a Wi-Fi 6E router, sold separately, to function in the 6GHz band. Availability of public wireless access points limited. Wi-Fi 6E is backwards compatible with prior 802.11 specs. Available in countries where Wi-Fi 6E is supported. For HP 800 G9 TWR/SFF without Intel® Core 13<sup>th</sup> and 14<sup>th</sup> Gen processors, the product does not support Wi-Fi 6E standard and does not operate under 6GHz band. The product is compatible with 6GHz and other routers, sold separately, which have capability to operate in 2.4GHz and 5GHz, in compliance with Wi-Fi 6 and prior 802.11 specs. The actual throughput depends on network condition and router configuration. Internet service required and public wireless access points are limited.

**NOTE:** WiFi-6E might be restricted by local regulation and only available in countries where Wi-Fi 6E is supported. HP will enable countries in the future by upgrading BIOS in default as the technology becomes available in more regions.

**NOTE:** Wireless access point and Internet service required and sold separately. Availability of public wireless access points limited. Wi-Fi 7 (802.11BE) functionality requires Windows 11 24H2 which would be available starting from end of Aug./2024. Selected Intel® Core 14<sup>th</sup> Gen processor, and a Wi-Fi 7 router, sold separately. Wi-Fi 7 is backwards compatible with prior 802.11 specs. Available in countries where Wi-Fi 7 is supported. The specification for 802.11BE is a draft specification and is not final. If the final specification differs from the draft specification, it may affect the ability of the device to communicate with other 802.11BE devices.

<sup>2.</sup> Wi-Fi 6 is designed to support gigabit data rate when transferring files between two devices connected to the same router. Requires a wireless router, sold separately, that supports 80MHz and higher channels.

1. External power supplies, power cords, cables and peripherals are not Low Halogen. Service parts obtained after purchase may not be Low Halogen.

#### **UNIT ENVIRONMENT AND OPERATING CONDITIONS**

General Unit Operating Guidelines

- Keep the computer away from excessive moisture, direct moisture and the extremes of heat and cold, to ensure that unit
  is operated within the specified operating range.
- Leave a 10.2 cm (4 in) clearance on all vented sides of the computer to permit the required airflow.
- Never restrict airflow into the computer by blocking any vents or air intakes.
- Do not stack computers on top of each other or place computers so near each other that they are subject to each other's re-circulated or preheated air.
- Occasionally clean the air vents on the front, back, and any other vented side of the computer. Lint, dust and other foreign matter can block the vents and limit the airflow.
- If the computer is to be operated within a separate enclosure, intake and exhaust ventilation must be provided on the enclosure, and the same operating guidelines listed above will still apply.

Temperature Range Operating: 50° to 95° F (10° to 35° C)<sup>2</sup>

Non-operating: -22° to 149° F (-30° to 65° C)

Relative Humidity Operating: 10% to 90% (non-condensing at ambient)

Non-operating: 5% to 95% (non-condensing at ambient)

Maximum Altitude Operating: 5000m

(unpressurized) Non-operating: 50000ft (15240 m)

2. Operating temperature is de-rated 1.0 deg C per 300 m (1000 ft) to 3000 m (10,000 ft) above sea level, no direct sustained sunlight. Maximum rate of change is 10 deg C/Hr. The upper limit may be limited by the type and number of options installed.

RoHS Compliance	HP Inc. complies fully with materials regulations. We were among the first companies to extend the restrictions in the European Union (EU) Restriction of Hazardous Substances (RoHS) Directive to our products worldwide through the HP GSE. HP has contributed to the development of related legislation in Europe, as well as China, India, and Vietnam.				
	We believe the RoHS directive and similar laws play an important role in promoting industry-wide elimination of substances of concern. We have supported the inclusion of additional substances—including PVC, BFRs, and certain phthalates—in future RoHS legislation that pertains to electrical and electronics products.				
	We met our voluntary objective to achieve worldwide compliance with the new EU RoHS requirements for virtually all relevant products by July 2013, and we will continue to extend the scope of the commitment to include further restricted substances as regulations continue to evolve.				
	To obtain a copy of the HP RoHS Compliance Statement, see: HP RoHS position statement.

Packaging Usage  End-of-life Management and Recycling	HP follows these guidelines to decrease the environmental impact of product packaging:  • Design packaging materials for ease of disassembly.  • Maximize the use of post-consumer recycled content materials in packaging materials.  • Use readily recyclable packaging materials such as paper and corrugated materials.  • Reduce size and weight of packages to improve transportation fuel efficiency.  • Plastic packaging materials are marked according to ISO 11469 and DIN 6120 standards.  HP Inc. offers end-of-life HP product return and recycling programs in many geographic areas. To recycle your product, please go to: http://www.hp.com/go/reuse-recycle or contact your nearest HP sales office. Products returned to HP will be recycled, recovered or disposed of in a responsible manner.
	The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard web site at: http://www.hp.com/go/recyclers. These instructions may be used by recyclers and other WEEE treatment facilities as well as HP 0EM customers who integrate and re-sell HP equipment. <sup>1.</sup> Wireless access point and Internet service required and sold separately. Availability of public wireless access points limited. Wi-Fi 6 (802.11ax) is backwards compatible with prior 802.11 specs. Wi-Fi 6 is designed to support gigabit data rate when transferring files between two devices connected to the same router. Requires a wireless router, sold separately, that supports 80MHz and higher channels. Wireless access point and Internet service required and sold separately. Availability of public wireless access points limited. Wi-Fi 6 (802.11ax) is backwards compatible with prior 802.11 specs

- 2. Check latest software/driver release for updates on supported security features.
- 3. The FCC has declared as of September 1, 2014 products that utilize passive scanning on channel 12/13 and are capable of transmitting must fully comply with requirements of 15.247 or otherwise disable those channels.
- 4. Receiver sensitivity is measured at a packet error rate of 8% for 802.11b (CKK modulation) and a packet error rate of 10% for 802.11a/g (OFDM modulation).

<sup>1.</sup> Wi-Fi 6E requires a Wi-Fi 6E router, sold separately, to function in the 6GHz band. Availability of public wireless access points limited. Wi-Fi 6E is backwards compatible with prior 802.11 specs. And available in countries where Wi-Fi 6E is supported. Wi-Fi 6E is designed to support gigabit data rate when transferring files between two devices connected to the same router. Requires a wireless router, sold separately, that supports 80MHz and higher channels.

- 2. Check latest software/driver release for updates on supported security features.
- 3. The FCC has declared as of September 1, 2014 products that utilize passive scanning on channel 12/13 and are capable of transmitting must fully comply with requirements of 15.247 or otherwise disable those channels.
- 4. Receiver sensitivity is measured at a packet error rate of 8% for 802.11b (CKK modulation) and a packet error rate of 10% for 802.11a/g (OFDM modulation).
- 5. Usage of the 6GHz band relies on Windows 11 Operating System support.

### **HP Elite Series 800 G9 Desktops PCs**

### QuickSpecs

- 1. Wi-Fi 7 requires a Wi-Fi 7 router, sold separately, to function in the 6GHz band. Availability of public wireless access points limited. Wi-Fi 7 is backwards compatible with prior 802.11 specs. And available in countries where Wi-Fi 7 is supported. Wi-Fi 7 is designed to support gigabit data rate when transferring files between two devices connected to the same router. Requires a wireless router, sold separately, that supports 80MHz and higher channels.
- 2. Check latest software/driver release for updates on supported security features.
- 3. The FCC has declared as of September 1, 2014 products that utilize passive scanning on channel 12/13 and are capable of transmitting must fully comply with requirements of 15.247 or otherwise disable those channels.
- 4. Receiver sensitivity is measured at a packet error rate of 8% for 802.11b (CKK modulation) and a packet error rate of 10% for 802.11a/g (OFDM modulation).

Technical Specifications – Power

The power supply shall comply with harmonic input current requirements as detailed in EN61000-3-2 and JEIDA MITI standards. The harmonic input current requirements must be met under the following operating conditions:

Load Requirements: 50% and 100%

Input Voltage: 230Vac/50Hz.

For active power factor correction the power factor at 50% &100% loads shall be greater than 0.9 over the entire nominal input voltage range (100-127VAC and 200-240VAC).

Technical Specifications – Miscellaneous Features

#### MISCELLANEOUS FEATURES

#### **Management Features**

- Advanced Configuration and Power Management interface (ACPI). Allows the system to wake from a low power mode.
   Controls system power consumption, making it possible to place individual cards and peripherals in a low-power or powered-off state without affecting other elements of the system.
- Intel® Wired for Management support; industry wide initiative to make Intel® architecture based PCs, servers and mobile computers more inherently manageable out-of-the-box and over the network
- Dual State Power Button; acts as both an on/off button and a suspend-to-sleep button

#### **Serviceability Features**

- Dual colored power LED on front of computer to indicate either normal or fault condition
- Diagnostic LED Explanation Table:
  - Power LED will blink red 2 to 5 times, then blink white 2 or more times, then repeat (with beep tones for each blink initially):
    - 2 red + 2 white User must provide file for BIOS recovery (USB storage typically)
    - 2 red + 3 white User must enter a key sequence to proceed with recovery by policy
    - 2 red + 4 white BIOS recovery is in progress
    - 3 red + 2 white Memory could not be initialized
    - 3 red + 3 white Graphics adaptor could not be found
    - 3 red + 4 white Power supply failure / not connected
    - 3 red + 5 white Processor not installed
    - 3 red + 6 white Current processor does not support an enabled feature
    - 4 red + 2 white Processor has exceeded its temperature threshold / system thermal shutdown
    - 4 red + 3 white System internal temperature has exceeded its threshold
    - 5 red + 2 white System controller firmware is not valid
    - 5 red + 3 white System controller detected BIOS is not executing
    - 5 red + 4 white BIOS could not complete initialization / PCA failure
    - 5 red + 5 white System controller rebooted the system after a health or recovery timer triggered
- HP PC Hardware Diagnostics UEFI:
  - This utility enables hardware level testing outside the operating system on many components. The diagnostics can be invoked by pressing F2 at POST, and is available as a download from HP Support
- System/Emergency ROM
- Flash ROM
- CMOS Battery
- Holder for easy replacement
- 1 Aux Power LED on System PCA
- Processor ZIF Socket for easy Upgrade
- Over-Temp Warning on Screen (Requires IM Agents)
- DIMM Connectors for easy Upgrade
- Clear CMOS Button
- NIC LEDs (integrated) (Green & Amber)
- Dual Color Power and HD LED To indicate Normal Operations and Fault Conditions
- Color coordinated cables and connectors
- Tool-less Hood Removal
- Front power switch
- · System memory can be upgraded without removing the system board or any internal components
- Tool-less Hard Drive, CD & Diskette Removal (For MT, SFF, and DM only)
- Green Pull Tabs, and Quick Release Latches for easy identification

Technical Specifications – Miscellaneous Features

Additional Features	Description
Tower Orientation	Product can be oriented as either a desktop (horizontal) or a tower (vertical) for Tower, SFF, and Mini only. SFF/Mini requires optional stand.
Drive Lock	Implementation of the industry standard ATA Security feature set. When enabled, it prevents software access to user data on the drive until one or two user-defined passwords are provided.
Boot Sectors Protection	MBR and GPT sectors of the hard drive are critical to booting the operating system. By saving the MBR or GPT data (depending on the how the OS was installed), the BIOS will be able to monitor for changes and allow the user to override them with the backup copy at boot-up.
Drive Protection System	DPS Access through F10 Setup during Boot (for SATA hard drive only)
	A diagnostic hard drive self- test. it scans critical physical components and every sector of the hard drive for physical faults and then reports any faults to the user
	Running independently of the operating system, it can be accessed through a Windows-based diagnostics utility or through the computer's setup procedure. It produces an evaluation on whether the hard drive is the source of the problem and needs to be replaced
	The system expands on the Self-Monitoring, Analysis, and Reporting Technology (SMART), a continuously running systems diagnostic that alerts the user to certain types of failures
SMART Technology (Self-Monitoring, Analysis and Reporting Technology)	Allows hard drives to monitor their own health and to raise flags if imminent failures were predicted
SMART I - Drive Failure Prediction	Predicts failures before they occur. Tracks fault prediction and failure indication parameters such as re-allocated sector count, spin retry count, calibration retry count
SMART II - Off-Line Data Collection	By avoiding actual hard drive failures, SMART hard drives act as "insurance" against unplanned user downtime and potential data loss from hard drive failure
SMART III – Off-Line Read Scanning with Defect Reallocation	IOEDC: I/O Error Detection Circuitry
SMART IV – End-to-End CRC for hard drive	s Detects errors in Read/Write buffers on HDD cache RAM
