# Welcome

Durable, fast, and portable, LaCie Rugged Mini SSD brings a seamless workflow to your project with USB and Thunderbolt 4 compatibility.

For common questions and answers about your device, see [Frequently Asked Questions](#) or visit [LaCie customer support](#).

## Box contents

- LaCie® Rugged® Mini SSD
- USB-C cable (USB 3.2 Gen 2x2)

## Minimum System Requirements

### Ports

Use the included cable to connect your LaCie device to a computer with a USB-C port.

### operating system

Go to [Operating System Requirements for Seagate Hardware & Software](#).

### Minimum free disk space

600 MB recommended.

## Ingress Protection rating

The Ingress Protection (IP) rating is a standard for defining the types of protection supported by equipment and devices. The two-digit code for IP lets users know the conditions that the device can withstand. The two digits are independent, with each number representing a different level of protection.

LaCie Rugged Mini SSD is rated IP54 when the cap is properly seated on the device.

**5: Dust protected** – Ingress of dust is not entirely prevented, but it must not enter in sufficient quantity to

interfere with the satisfactory operation of the equipment.

**4: Spraying of water** – Water splashing against the enclosure from any direction shall have no harmful effect, utilising either: a) an oscillating fixture, or b) a spray nozzle with no shield.

**Note** – IP 54 is not in effect when the cap is removed from the device.

Rugged Mini SSD has also been tested for the following:

- **Drop resistance** – Dropped from heights up to 3 metres (in non-operating mode).

# Getting Started

## Rugged Mini SSD performance

You can connect your device to any USB-C port on your computer, but transfer rates vary:

Port	Transfer rates
USB 3.1 Gen 1	up to 5 Gb/s
USB 3.1 Gen 2	up to 10 Gb/s
USB 3.2 Gen 2x2	up to 20 Gb/s

## Connect LaCie Rugged Mini SSD

1. Remove the top port cover from Rugged Mini SSD.
2. Plug one end of the USB-C cable into the USB-C port on Rugged Mini SSD.
3. Plug the other end of the cable into a USB-C port on your computer.

## Set up LaCie Rugged Mini SSD

The setup process lets you:

Register your LaCie Rugged Mini SSD

Get the most from your drive with easy access to information and support.

Install Toolkit

Manage mirror folders, backup plans (Windows only) and more.

Your computer must be connected to the internet to register your device and install Toolkit.

### Start here

Using a file manager such as Finder or File Explorer, open LaCie Rugged Mini SSD and launch **Start Here Mac** or **Start Here Win**.

Windows®

If your drive no longer has a Start Here icon, you can [register your device on lacie.com](#). Toolkit can be downloaded from the [Toolkit support page](#).

## Register your device

Enter your information and click **Register**.

## Register

I have read and agree to...

- Terms and Conditions
- Privacy Statement
- Optional Offers

## Download Toolkit

Click the **Download** button.

## Install Toolkit

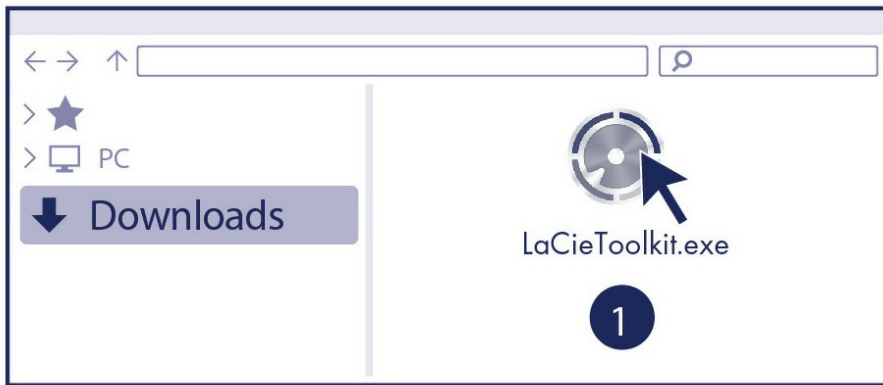

Using a file manager such as Finder or File Explorer, go to the folder where you receive downloads.

- **Mac** – Open the LaCieToolkit.zip file and click on the LaCie Toolkit Installer to launch the application.
- **Windows** – Click on the LaCieToolkit.exe file to launch the application.

## Mac®

## Windows®

# Use Toolkit to Set Up Backups and More

Toolkit provides useful tools that let you easily create and manage mirror folders, backup plans and more.

## Start a backup plan (Windows only)

Create a plan customised for the content, storage device, and schedule of your choosing.

- [Click here](#) for details on setting up a backup plan.

## Create mirror folders

Create a mirror folder on your PC or Mac that is synced to your storage device. Whenever you add, edit, or delete files in one folder, Toolkit automatically updates the other mirror folder with your changes.

- [Click here](#) for details on creating a mirror folder.

# Works with iPad USB-C

Your LaCie storage devices can be used with higher-end iPads. This is a great option for moving files between computers, cloud services and external storage. The iPad is also a perfect mobile editing station for importing media to more advanced imaging and video apps.

See [External Storage and iPadOS](#) for details on the following:

- Connecting Storage to Compatible iPads
- Available Actions
- Selecting Multiple Items
- Accessing Storage Devices in an App
- Supported External Storage Devices and USB Hubs
- External Storage Performance on iPad Versus a Computer
- Thunderbolt Storage Devices
- Battery Use
- Ejecting
- Storage Formats
- Password Protection
- Toolkit and First Use Connections

# Safely Remove Device From Your Computer

Always eject a storage drive from your computer before physically disconnecting it. Your computer must perform filing and housekeeping operations on the drive before it is removed. Therefore, if you unplug the drive without using the operating system's software, your files can become corrupt or damaged.

## Windows

Use the Safely Remove tool to eject a device.

1. Click the Safely Remove Hardware icon in your Windows System Tray to view the devices you can eject.
2. If you don't see the Safely Remove Hardware icon, click the Show hidden icons arrow in the system tray to display all icons in the notification area.
3. In the list of devices, choose the device you want to eject. Windows displays a notification when it is safe to remove the device.
4. Disconnect the device from the computer.

## Mac

There are several ways you can eject your device from a Mac. See below for two options.

### Eject via Finder window

1. Open a Finder window.
2. On the sidebar, go to Devices and locate the drive you want to eject. Click the eject symbol to the right of the drive name.
3. Once the device disappears from the sidebar or, the Finder window closes, you can disconnect the interface cable from your Mac.

### Eject via Desktop

1. Select the desktop icon for your device and drag it to the Trash.
2. When the device icon is no longer visible on your desktop, you can physically disconnect the device from your Mac.

# Optional Formatting

Your device is preformatted exFAT (Extended File Allocation Table) for compatibility with both Mac and Windows computers.

## Choosing a file system format

When choosing a file system format, consider whether **compatibility** or **performance** is more important in your everyday use of the drive.

- **Compatibility**—You need a cross-platform format because you connect your drive to both PCs and Macs.
- **Performance**—You connect your drive with only one type of computer, so you can optimize file copy performance by formatting the drive in the native file system for your computer operating system.

## Compatibility with both Windows and Macs

exFAT is a lightweight file system compatible with all versions of Windows and modern versions of macOS. If you use your drive with both PCs and Macs, format your drive in exFAT. While exFAT offers cross-platform access to both computers, keep in mind the following:

- exFAT is not compatible or recommended for built-in backup utilities such as File History (Windows) and Time Machine (macOS). If you want to use one of these backup utilities, you should format the drive in the native file system for the computer running the utility.
- exFAT is not a journaled file system, which means it can be more susceptible to data corruption when errors occur or the drive is not disconnected properly from the computer.

## Optimized performance for Windows

NTFS (New Technology File System) is a proprietary journaling file system for Windows. macOS can read NTFS volumes, but it can't natively write to them. This means your Mac can copy files from an NTFS-formatted drive, but it can't add files to or remove files from the drive. If you need more versatility than this one-way transfer with Macs, consider exFAT.

## Optimized performance for macOS

Apple offers two proprietary file systems.

Mac OS Extended (also known as Hierarchical File System Plus or HFS+) is an Apple file system used since 1998 for mechanical and hybrid internal drives. macOS Sierra (version 10.12) and earlier use HFS+ by

default.

APFS (Apple File System) is an Apple file system optimized for solid state drives (SSDs) and flash-based storage systems, though it also works with hard disk drives (HDDs). It was first introduced with the release of macOS High Sierra (version 10.13). APFS can only be read by Macs running High Sierra or later.

When choosing between Apple file systems, consider the following:

- Windows cannot natively read or write to APFS or HFS+ volumes. If you need cross-platform compatibility, you should format the drive in exFAT.
- If you intend to use your drive with Time Machine:
  - The default format for macOS Big Sur (version 11) and later is APFS.
  - The default format for macOS Catalina (version 10.15) and earlier is HFS+.
- If you intend to use your drive to move files between Macs running older OS versions, consider formatting your drive in HFS+ rather than APFS.
- macOS file systems and Android: Formatting your drive for macOS may not be supported with connections to Android mobile devices.

## Learn more

For additional considerations when choosing a file system format, see [File System Format Comparisons](#).

## Formatting instructions

For instructions on formatting your drive, see [How to format your drive](#).

# Frequently Asked Questions

For help setting up and using your LaCie drive, review the frequently asked questions below. For additional support resources, go to [LaCie customer support](#).

## All users

### Problem: My file transfers are too slow

Q: Are both ends of the USB cable firmly attached?

A: Review troubleshooting tips for cable connections below:

- Check both ends of the USB cable and make sure that they are fully seated in their respective ports.
- Try disconnecting the cable, waiting 10 seconds, and then reconnecting it.
- Try a different USB cable.

Q: Are there other USB devices connected to the same port or hub?

A: Disconnect other USB devices and see if the drive's performance improves.

### Problem: I have an older computer with USB 3.0 (Type A) ports

Q: Will my drive's USB-C (USB 3.2 Gen 2x2) port work with my computer's USB 3.0 port?

A: Yes, the device is compatible with USB 3.0 ports, however, the product does not include a cable with a USB Type A connector. Performance is limited to USB 3.0 transfer rates.

### Problem: I must use a USB hub for my USB devices

Q: Can I use my drive with a USB hub?

A: Yes, the drive can be connected to a USB hub. If you use a hub and encounter detection problems, slower than normal transfer rates, random disconnection from your computer or other unusual issues, try connecting the drive directly to the computer's USB port.

Some USB hubs are less than efficient with power management, which can be problematic for connected

devices. In such a case, consider trying a powered USB hub that includes a power cable.

## Problem: The provided USB cable is too short

Q: Can I use my drive with a longer cable?

A: Yes, provided it is certified according to USB standards. However, LaCie recommends using the cable shipped with your drive for the best results. If you use a longer cable and experience problems with detection, transfer rates, or disconnection, use the original cable included with your drive.

## Problem: I'm receiving file transfer error messages

Q: Did you get an "Error -50" message while copying to a FAT32 volume?

A: When copying files or folders from a computer to a FAT32 volume, certain characters in the names cannot be copied. These characters include, but are not limited to: ? < > / \ :

Check your files and folders to ensure that these characters are not in the names.

If this is a recurring problem or you cannot find files with incompatible characters, consider reformatting the drive to NTFS (Windows users) or HFS+ (Mac users). See [Optional Formatting and Partitioning](#).

# Mac

## Problem: The drive icon does not appear on my desktop

Q: Is your Finder configured to hide drives on the desktop?

A: Go to Finder and then check **Preferences | General tab | Show these items on the desktop**. Confirm that **Hard Disks** is selected.

Q: Is your drive mounting in the operating system?

A: Open Disk Utility at **Go | Utilities | Disk Utility**. If the drive is listed in the left-hand column, check your Finder preferences to see why it is not displayed on the desktop (review the question above).

Q: Does your computer's configuration meet the minimum system requirements for use with this drive?

A: Go to the following link for a list of supported operating systems: [www.lacie.com/os](http://www.lacie.com/os).

Q: Did you follow the correct installation steps for your operating system?

A: Review the installation steps in [Getting Started](#).

## Problem: I want to use my device with Time Machine.

Q: Can I use my device with Time Machine?

A: Yes. The drive is preformatted exFAT for use with both PC and Mac. For Time Machine, it must be reformatted to Mac. Reformatting will delete all data previously stored on the drive. Go to [www.lacie.com/time-machine](http://www.lacie.com/time-machine) for more details.

## Windows

### Problem: The drive icon doesn't appear in Computer

Q: Is the drive listed in Device Manager?

A: All drives appear in at least one place in Device Manager.

Type **Device Manager** in Search to launch it. Look in the **Disk Drives** section and, if necessary, click the Plus (+) icon to view the full list of devices. If you're uncertain that your drive is listed, safely unplug it and then reconnect it. The entry that changes is your LaCie drive.

Q: Is your drive listed next to an unusual icon?

A: Windows Device Manager usually provides information about failures with peripherals. While the Device Manager can assist with troubleshooting most problems, it may not display the exact cause or provide a precise solution.

An unusual icon next to the drive can reveal a problem. For example, instead of the normal icon based on the type of device, it has an exclamation point, question mark or an X. Right-click this icon and then choose **Properties**. The **General** tab provides a potential reason why the device is not working as expected.

# Regulatory Compliance

Product Name LaCie Rugged Mini SSD

Regulatory Model Number LRD0SV3

## China RoHS 2

China RoHS 2 refers to the Ministry of Industry and Information Technology Order No. 32, effective July 1, 2016, titled Management Methods for the Restriction of the Use of Hazardous Substances in Electrical and Electronic Products. To comply with China RoHS 2, we determined this product's Environmental Protection Use Period (EPUP) to be 20 years in accordance with the Marking for the Restricted Use of Hazardous Substances in Electronic and Electrical Products, SJT 11364-2014.

中国 RoHS 2 是指 2016 年 7 月 1 日起施行的工业和信息化部令第 32 号“电力电子产品限制使用有害物质管理办法”。为了符合中国 RoHS 2 的要求，我们根据“电子电气产品有害物质限制使用标识”(SJT 11364-2014) 确定本产品的环保使用期 (EPUP) 为 20 年。

部件名称 Part Name	有害物质 Hazardous Substances					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr <sup>6+</sup> )	多溴联苯 (PBB)	多溴二苯醚 (PBDE)
固态驱动器 SSD	X	O	O	O	O	O
外接硬盘印刷电路板 Bridge PCBA	X	O	O	O	O	O
电源(如果提供) Power Supply (if provided)	X	O	O	O	O	O
接口电缆(如果提供) Interface cable (if provided)	X	O	O	O	O	O
其他外壳组件 Other enclosure components	O	O	O	O	O	O

本表格依据 SJ/T 11364 的规定编制。  
This table is prepared in accordance with the provisions of SJ/T 11364-2014

O: 表示该有害物质在该部件所有均质材料中的含量均在 GB/T 26572 规定的限量要求以下。  
O: Indicates that the hazardous substance contained in all of the homogeneous materials for this part is below the limit requirement of GB/T26572.

X: 表示该有害物质至少在该部件的某一均质材料中的含量超出 GB/T 26572 规定的限量要求。  
X: Indicates that the hazardous substance contained in at least one of the homogeneous materials used for this part is above the limit requirement of GB/T26572.

# Taiwan RoHS

Taiwan RoHS refers to the Taiwan Bureau of Standards, Metrology and Inspection's (BSMI's) requirements in standard CNS 15663, Guidance to reduction of the restricted chemical substances in electrical and electronic equipment. Beginning on January 1, 2018, Seagate products must comply with the "Marking of presence" requirements in Section 5 of CNS 15663. This product is Taiwan RoHS compliant. The following table meets the Section 5 "Marking of presence" requirements.

台灣RoHS是指台灣標準局計量檢驗局(BSMI)對標準CNS15663要求的減排電子電氣設備限用化學物質指引。從2018年1月1日起, Seagate產品必須符合CNS15663第5節「含有標示」要求。本產品符合台灣RoHS。下表符合第5節「含有標示」要求。

產品名稱: 外接式固態硬碟, 型號: LRD0SV3		Product Name: LaCie Rugged Mini SSD, Model: LRD0SV3					
單元 Unit		限用物質及其化學符號			Restricted Substance and its chemical symbol		
		鉛 (Pb)	汞 (Hg)	鎘 (Cd)	六價鉻 (Cr <sup>+6</sup> )	多溴聯苯 (PBB)	多溴二苯醚 (PBDE)
固態驅動器	SSD	—	○	○	○	○	○
外接硬盤印刷電路板	Bridge PCBA	—	○	○	○	○	○
電源 (如果提供)	Power Supply (if provided)	—	○	○	○	○	○
傳輸線材 (如果提供)	Interface cable (if provided)	—	○	○	○	○	○
其他外殼組件	Other enclosure components	○	○	○	○	○	○
備考 1. "○" 係指該項限用物質之百分比含量未超出百分比含量基準值。 Note 1. "○" indicates that the percentage content of the restricted substance does not exceed the percentage of reference value of presence.							
備考 2. "—" 係指該項限用物質為排除項目。 Note 2. "—" indicates that the restricted substance corresponds to the exemption.							

額定電壓/額定電流: 5VDC == 1.5A      操作溫度: 5 – 40 °C
