2-to-1 and 3-to-1 CAT6 10-GbE Manual Switches

Securely access two or three high-speed, 10-GbE networks!

FEATURES

» Great for high-bandwidth network switching, this desktop device enables you to switch between wire-speed networks at the push of a button—and do so securely.

» Switch between two or three separate Ethernet networks from one PC without plugging and unplugging cables.

» Provide total electrical isolation, so you can safely access secure and public networks from the same desktop.

» Use in networks from 10BASE-T all the way up to 10-Gigabit Ethernet (10-GbE).

» Proprietary design ensures crosstalk isolation for high-end performance and full 10-GbE support.

» Simply connect your host device (or shared network link) to Port C (Common port), then connect the different networks or Ethernet devices to the A and B ports or the A, B, and D ports.

» Operate manually. Just push a button to switch to another network.

» No power required.

TECH SPECS

MTBF — 100,000 cycles
Operating Temperature — 32 to 158° F (0 to 70° C)
CE Approval — Yes
Connectors — SW1030A: (3) RJ-45; SW1031A: (4) RJ-45
Power — None
Size — 2.75"H x 6.1"W x 6.5"D (7 x 15.5 x 16.5 cm)
Weight — 2 lb. (0.9 kg)
