Action Organizer Feature

OVERVIEW

The [Action Organizer](#) is an equipment bay and a cable management unit in one.

The heavy-duty steel frame protects and supports large equipment and advanced cable management. The rack, which measures 84" high and 24" wide, is available in either 24", 30", or 36" depths.

Installation-friendly design features easy access, increased visibility, and free-flow air distribution.

The unique quick-release shelving system enables the Vented Quick-Release Shelves (RM921, RM929, or RM922) to be mounted independently from the rack's EIA mounting holes and lets you easily change the shelf location without the use of any tools or screws.

Optional Cable Management Kits (RM923 or RM924) hold your cables securely in the rack. Each kit comes with 4"- or 6"-deep D-rings.

The Cable Management Channel (RM926) features six built-in 6" x 2" D-rings for use with additional cable runs.

Power strips can be mounted directly to the back of the rack or the optional cable channel. The Cable Channel (RM925) features six 2" x 2" D-rings and holds two 20-amp power strips.

A pack of 50 M6 Cage Nuts and 50 M6 Mounting Screws is included with each rack.

The rack conforms to standard 19-inch EIA equipment.
