## Battery Powered No Touch Request to Exit Stations

The battery powered No Touch Request to Exit Activation Switches use infrared sensors to reliably allow safe egress or activation of a device with a simple hand presentation.

These request to exit solutions provide greater flexibility and control for sensitive applications, without the need to make costly modifications, extending touch-free access and egress in an easy and affordable way. The NTB Series is a direct replacement for traditional "request to exit" push buttons and can be used to quickly upgrade existing applications to code compliant no touch solutions using existing wiring.

# Switch Information Guide

## Single Pole – Single Throw (SPST)

Switches that have one input and one output (NO or NC) and turn on or off in response to the switch action

## Single Pole – Double Throw (SPDT)

Switches with one input and two outputs. When the switch operation occurs, the connection shifts from output A to output B

## Double Pole – Single Throw (DPST)

Two SPST switches that operate in tandem using one switch operation so that two outputs turn on or off simultaneously in reaction to the switch operation

## Double Pole – Double Throw (DPDT)

Two SPDT switches that operate in tandem using one switch operation so that each connection shifts simultaneously from its primary output to its secondary output

## Momentary Switch

A momentary switch changes state during activation and reverts to its original state upon deactivation. A doorbell is a common example of a momentary switch. A timer can be used to extend the effect of the switch operation for a specific amount of time.

## Alternate Switch

An alternate switch changes state upon activation and does not change back until reactivated. A light switch is a common example of an alternate switch. Alternate switches are also called maintained or latching switches

## Normally Open Contacts (NO)

A normally open contact provides an open circuit where no current is flowing in its usual state.

Wired in parallel for fail secure type electric locks (i.e. electric strike). Activating any switch will apply power, releasing the lock.

## Normally Closed Contacts (NC)

A normally closed contact provides a closed circuit where current is flowing in its usual state.

Wired in Series for fail safe type electric locks (i.e. Securitron Magnalocks). Activating any switch will break power, releasing the lock.

- Capacity up to 1000 user codes, length from 4 to 8 digits
- 50 visitor codes, programmable for one time use or with time limit
- Fully programmable from the keypad
- Programmable passage and false code lockout mode capabilities
- Built-in tamper switch
- Red, green, and yellow LEDs for status and programming feedback
- Fail safe or fail secure capable
- Request to Exit (REX) input
- Audible and visible key press; keys are backlit for visibility
- For indoor applications only
- 3 year warranty
- Tamper Switch: N/C dry contact; 50mA/24 VDC Max

## Digital Keypad

Self-contained, narrow stile digital keypad designed for pedestal/mullion mounting. Vandal resistant and weather resistant with durable metal keys and housing, suitable for indoor and outdoor applications.

### Features

#### Standard Features

- Narrow stile mullion mount with die cast zinc alloy housing
- Narrow stile 10-digit operation (10 digits plus \* and # keys)
- Operates with card only, user code and card, or user code only
- Multiple outputs allow control of up to two devices (1000 users on output 1, 100 on output 2)
- All users can be programmed for card and/or codes at the device
- 50 Visitor cards and/or codes can be programmed for one time use or with time limit at the device
- Programmable passage and false-code lockout mode capabilities
- Built-in tamper switch
- Green and yellow LEDs for status and programming feedback
- Fail safe or fail secure capable

- Die-cast metal keys with audible and visible key press; Keys are backlit for visibility in dark areas
- For indoor or outdoor applications
- 3 year warranty

#### Options

- Supplied with 2 EM cards. **EM-10** additional pack of 10 cards
- **EM-04** key fobs

# Electric Strikes

# AES-100

## Electric Strike

Grade 1 dual-voltage electric strike for heavy-duty applications. For use with cylindrical locksets, mortise latch or mortise exit devices.

## Features

### Standard Features

- For use with 5/8" and 3/4" throw cylindrical locksets
- Strike depth: 1-1/2"
- Field selectable, Fail Secure/Fail Safe
- Non-handed for easy installation
- Mounting kit includes two 4-7/8" stainless steel faceplates (one round corner and one square corner)

### Options

- **STR00004** 7-15/16" round corner faceplate, available separately

## Specifications

### Certifications & Listings

- BHMA Grade 1
- UL 1034 burglary-resistant listed

### Holding Force

- Static Strength: 1500 lbs
- Dynamic Strength: 70 ft lbs

### Endurance

- UL tested to 250,000 cycles

### Electrical

- Current draw: 130mA at 12 VAC, 70mA at 24 VAC; 210mA at 24 VDC
- Dual-voltage 12/24 VAC/VDC; continuous duty operation on DC

# AES-200

## Electric Strike

Grade 2 electric strike for medium-duty applications. For use with cylindrical locksets with latchbolt monitor and buzzer.

## Features

### Standard Features

- For use with 5/8" and 3/4" throw cylindrical locksets
- With Latch Bolt Monitor and Buzzer
- Strike depth: 1-1/2"
- Field selectable, Fail Secure/Fail Safe
- Non-handed for easy installation
- Adjustable keeper
- Mounting kit includes two 4-7/8" stainless steel faceplates (one round corner and one square corner)
- Preload capable up to 70 lbs
- Built-in buzzer, sounds when voltage is applied

### Options

- **STR00004** 7-15/16" round corner faceplate, available separately

## Specifications

### Certifications & Listings

- BHMA Grade 2

### Holding Force

- Static Strength: 1000 lbs
- Dynamic Strength: 70 ft lbs

### Electrical

- Dual voltage 12/24 VAC/VDC, continuous duty operation on DC
- Current draw 1 mA at 12 VDC/VAC, 70 mA at 24 VDC/VAC
- Strike monitored with SPDT dry contact

# AES-300

## Electric Strike

Flexible electric strike offers value and innovation in one compact product. Horizontal adjustability and small body design eliminates need to cut out the dust box making this a great option for retrofit applications.

### Features

#### Standard Features

- For use with 5/8" cylindrical locksets
- Strike depth: 1-3/16"
- Available in fail secure only
- Non-handed for easy installation
- Small body design eliminates the need to cut out the dust box

#### Options

- **AES-30012SB**, **AES-30024SB** strike body available separately

- Spacer and keeper shims for horizontal adjustment available in KIT option
- Mounting Kit with multiple faceplates available in KIT options only

### Specifications

#### Certifications & Listings

- BHMA Grade 2

#### Holding Force

- Static Strength: 1000 lbs
- Dynamic Strength: 50 ft lbs

#### Endurance

- UL tested to 250,000 cycles

#### Electrical

- Available in either 12 or 24 VAC or VDC
- Current draw: 200mA at 12 VAC/VDC, 100 mA at 24 VAC/VDC

# Monitoring & Control Stations

# SLP-XM Series

## Momentary Monitor & Control Stations

Monitor and control stations with rectangular illuminated DPDT momentary switches that remain active as long as they're depressed. Stations include LED status indicators and are designed to release or secure and monitor one or more electrified lock.

SLP-1M

SLP-5M

SLP-8M

### Features

#### Standard Features

- Release or secure and monitor one or more electrified lock
- Switches mounted on wall plate with stainless steel finish. 1,2,3,4 gang options available.
- 1/2" red LED status indicator
- Green momentary push button; hi-brightness LED illumination

#### Options

- **XM** with X designating the number of LEDs and illuminated momentary buttons. Specify 1 - 8 for that many LEDs/buttons.
- Custom legends, green and yellow LEDs, available as custom parts

### Specifications

#### Dimensions

- Varies based on finished good

#### Electrical

- DPDT switch contacts rated 3A at 35 VDC or 120 VAC
- Switch depth behind plate: 1-1/2"
- LED operates on 12 or 24 VDC/VAC
- Switch and LED terminated with colored leads

# SLP-XL Series

## Latching Monitor & Control Stations

Monitor and control stations with rectangular illuminated DPDT latching switches that alternate between open (disconnected) and closed (connected) each time they're pressed. Stations include LED status indicators and are designed to release or secure and monitor one or more electrified lock.

## Features

### Standard Features

- Release or secure and monitor one or more electrified lock
- Switches mounted on wall plate with stainless steel finish. 1,2,3,4 gang options available.
- 1/2" red LED status indicator
- Green alternating push button; hi-brightness LED illumination

### Options

- **XL** with X designating the number of LEDs and illuminated alternating buttons. Specify 1 - 8 for that many LEDs/buttons.
- Custom legends, green and yellow LEDs, available as custom parts

## Specifications

### Dimensions

- Varies based on finished good

### Electrical

- DPDT switch contacts rated 3A at 35 VDC or 120 VAC
- Switch depth behind plate: 1-1/2"
- LED operates on 12 or 24 VDC/VAC
- Switch and LED terminated with colored leads

# TS-55G

## Momentary Monitor & Control Station

Monitor and control station with round illuminated DPDT momentary push button that remains active as long as it's depressed. Station includes LED status indicator and is designed to release or secure and monitor one electrified lock.

TS-55G

TS-55R

### Features

#### Standard Features

- Release or secure and monitor one electrified lock
- Switches mounted on single gang wall plate with stainless steel finish
- 1-1/2" momentary green push button; hi-brightness LED illumination
- 1/2" red LED status indicator
- Button labeled "EXIT"

#### Options

- **TS-55R** with red push button
- **GR** guard ring
- **LUC** lift up cover

### Specifications

#### Certifications & Listings

- IP65 standard

#### Dimensions

- 2-3/4" x 4-1/2"

#### Electrical

- One N/O and one N/C contact rated 10A at 35 VDC or 120 VAC
- LED operates on 12 or 24 VDC/VAC

# TS-56G

## Latching Monitor and Control Station

Monitor and control station with round illuminated DPDT latching push button that alternates between open (disconnected) and closed (connected) each time it's pressed. Station includes LED status indicator and is designed to release or secure and monitor one electrified lock.

TS-56G

TS-56R

### Features

#### Standard Features

- Release or secure and monitor one electrified lock
- Switches mounted on single gang wall plate with stainless steel finish
- 1/2" red LED status indicator
- 1-1/2" alternating green push button; hi-brightness LED illumination
- Button labeled "EXIT"

#### Options

- **TS-56R** with red push button
- **GR** guard ring
- **LUC** lift up cover

### Specifications

#### Certifications & Listings

- IP65 standard

#### Dimensions

- 2-3/4" x 4-1/2"

#### Electrical

- One N/O and one N/C contact rated 10A at 35 VDC or 120 VAC
- LED operates on 12 or 24 VDC/VAC

# DTC Desktop Console

Desktop Console with single or multiple switch configurations. Choose between momentary action switches that remain active as long as they're depressed or alternate action switches that alternate between open (disconnected) and closed (connected) each time they're pressed. Designed to work with door status or lock status sensors in order to supervise and control several entry points from one main location.

## Configurable Options

- **M1** with 1-2 switches, specify number of switches when ordering
- **M2** with 3-12 switches, specify number of switches when ordering
- **M3** with 13-40 switches, specify number of switches when ordering
- Console: specify **G** (beige) or **K** (black)
- Switch type, specify: SPDT/DPDT, momentary/alternate
- Lens color: green, red, yellow, blue, white

- Illumination: None, 12 VDC, 24 VDC
- Button labels available as a custom part

# Power

# APS-200 Series

## Power Supplies

Dual voltage switching power supply with battery charger designed to provide power for magnetic locks, electric strikes, card readers, sensors, access control boards and other components of access control systems.

## Features

### Standard Features

- 2 Amp Power Supply mounted in UL listed enclosure
- Tolerates brownout or overvoltage input +/- 15% of nominal voltage
- Thermal shutdown protection with auto restart
- Circuit breaker protects against overcurrent and reverse battery faults (batteries sold separately)
- Dedicated battery charging circuit prevents overvoltage on locking devices
- Low noise design provides better than linear performance
- Limited lifetime warranty

### Options

- **APS-2004C** 2 Amp Power Supply with one PD4C, four output PTC protected distribution boards
- **APS-200FT** 2 Amp Power Supply with one PDFT fire relay module

## Specifications

### Electrical

- Dual voltage 12 or 24 VDC field selectable output
- 115 or 230 VAC input
- Supports up to two sealed gel, AGM or wet lead acid batteries
- Up to 90% efficiency
- Low voltage ripple design as low as 240mV p-p

### Operating Temperature

- -4 to +122F [-20 to +50C]

## Fire Relay Module

The PDFT Fire Relay Module is triggered in response to a fire system alarm condition. Transferred power can be used to unlock doors to allow free egress in case of emergency.

## Features

### Standard Features

- Individual LED indicators show which output is powered
- Form C contact indicates trigger status
- Latching or non-latching mode
- Can provide ground supervision via jumper configuration
- Output triggers include:
  - N/O or N/C with supervised end-of-line resistor
  - N/C override switch trigger input
  - N/C Auxiliary switch trigger input
  - Ground fault detection
  - Trigger status reporting
- Limited lifetime warranty

## Power Distribution Module

Splits the primary AC or DC output from a power supply into multiple outputs of the same voltage type to separate equipment onto individual circuits.

## Features

### Standard Features

- 1A glass fuse
- Splits main board output into multiple outputs
- Each output has a status LED indicator
- Main input has a status LED indicator
- Accepts AC or DC input/ provides same output
- Has on/off power switch
- Separate fuse for main input surge protection-standard automotive ATO sizes
- Limited lifetime warranty

### Electrical

- 12 V or 24 V output (based on power supply output)
- Fuses for individual outputs are standard 3AGC

# DL-1, DL-2

## Armored Door Loops

18" armored door loop used to transfer low-voltage electrical current from the door frame to the door. Available with either plastic (DL-1) or aluminum alloy (DL-2) end caps. Mounting hardware included.

### Features

#### Standard Features

- 18" long armored door loop
- Mounting hardware included
- End Caps:
  - **DL-1:** white and brown plastic
  - **DL-2:** aluminum alloy
- Steel jacket resists abrasion and damage
  - **DL-1:** .250 I.D. steel
  - **DL-2:** rugged .375 I.D steel

#### Optional Features

- Custom lengths available
- **DL-2ELECTRO** DL-2 with ElectroLynx connector

# PowerAccessories

## 4152

### Kill Switch

- Provides a safe and convenient way to disconnect panel power by removing power from back-up battery and AC source
- DPST toggle switch with 10 Amp contacts
- Unique clip allows quick and easy installation

## CL-3

### Camlock

- Used to secure control panel from tampering
- 1" cam
- Supplied with two single bitted flat keys, keyed alike
- Steel chrome plated lock
- Speed clip secures cam lock to panel cover
- Optional **CL-3 (50)** multi pack of 50

## Wireless Transmitters

Wireless remote transmitters allow access control for up to three doors from one device. Ideal for front desk/reception applications or hard-to-wire locations. Designed to work with magnetic locks, electric strikes, keypads, gate operators and door operators. Kits include channel receiver and transmitter with mount and keychain.

## Features

### Standard Features

- Transmitter can be mounted under a desk or on a wall
- 12" antenna with up to 300' range
- Rolling code with over 1 billion code combinations
- Latching option keeps doors unlocked until button is pressed again
- Receiver can be controlled by up to 30 transmitters
- Receiver has a 5 second momentary output

### Options

- **RT-1** one receiver, two transmitters
- **RT-1T** additional transmitter
- **RT-1TW** additional transmitter with wire lead
- **RT-3** three receivers, one transmitter
- **RT-3R** additional receiver

## Specifications

### Certifications & Listings

- CE Certified
- RoHS compliant

### Dimensions

- 2-1/2"L x 1-1/4"W x 3/4"D

### Electrical

- Receiver operates on 12 or 24 VDC/VAC
- Max current draw 50mA
- Relay SPDT contact rated 1A at 30 VDC or 120 VAC
- Working frequency: 433.92 MHz

### Operating Temperature

- -4 to +140F

# TS-34 Series

## Mounted Wall Buzzers

Audible buzzer station for mounting on single gang or narrow wall plate

### Features

#### Standard Features

- Buzzer mounted on wall plate with stainless steel finish
- Sound level 85db at 3ft

#### Options

- **TS-34** mounted on single gang wall plate with 430 stainless steel finish
- **TS-34N** mounted on narrow wall plate with 302 stainless steel
- Finishes: multiple plate options available
- Custom screening available

### Specifications

# ALARM CONTROLS® WARRANTY

---

Alarm Controls (“seller”) warrants its security equipment (“the product”) to be free from defects in materials and workmanship for the life of the product, unless expressly stated otherwise, under normal use and service. Digital Keypads and Passive Infrared Detectors have a three year warranty. Seller’s obligation is limited to repairing or replacing, at its option, free of charge for parts, labor, or transportation, any part proven to be defective in material or workmanship under normal use and service. Seller shall have no obligation under this warranty or otherwise if the product is altered or improperly repaired or serviced by anyone other than the Seller.

This limited warranty is in lieu of all other express warranties, obligations, or liabilities. There are no express warranties which extend beyond the face hereof. All implied warranties, obligations or liabilities made by Seller in connection with this product, including any implied warranty of merchantability, or fitness for a particular purpose or otherwise are limited to the stated warranty period. In no case shall the Seller be liable to anyone for any consequential or incidental damages for breach of this or any other warranty, express or implied, or upon any other basis of liability whatsoever, even if the loss or damage is caused by the Seller’s own negligence or fault.

Seller does not represent that the product may not be compromised or circumvented; that the product will prevent any personal injury or property loss by burglary, robbery, fire or otherwise; or that the product will in all cases provide adequate warning or protection. Buyer understands that a properly installed and maintained security system may only reduce the risk of burglary, robbery or fire occurring without providing an alarm, but it is not insurance or a guarantee that such will not occur or that there will be no personal injury or property loss as a result. Consequently, Seller shall have no liability for any personal injury, property damage or other loss based on a claim the product failed to give warning. However, if Seller is held liable, whether directly or indirectly, for any loss or damage arising under this limited warranty or otherwise, regardless of cause or origin, Seller’s maximum liability shall be the complete and exclusive remedy against Seller.
