CENTRAL POWER HUB

24/7 TECHNICAL SUPPORT AT 1.877.877.2269 OR VISIT BLACKBOX.COM

BLACK BOX

The Central Power Hub is a rack-mounted intelligent power supply unit that allows you to supply up to sixteen separate devices and maintain remote monitoring and control. Specialized short circuit and overload protection features come standard while supply redundancy is offered as an option for mission-critical installations.

TO DOWNLOAD THE USER GUIDE FROM THE WEB SITE

- 1 Go to **www.blackbox.com**
- 2 Enter the part number in the search box:

- 3 Click on the **Resources** tab on the product page and select the document you wish to download.

Notes:

- ♦ If you have any trouble accessing the Black Box site to download the user guide, please contact our Technical Support at 877-877-2269 or info@blackbox.com
- ♦ You can also download the latest firmware releases from www.blackbox.com

SAFETY INFORMATION

(The full user guide is available at www.blackbox.com)

- ♦ For use in dry, oil free indoor environments only.
- ♦ Do not attempt to service the units yourself.
- ♦ **WARNING!** Live parts are contained within power modules.
- ♦ Power modules contain no user-serviceable parts—do not dismantle.
- ♦ Do not use an unearthed power socket or extension cable.
- ♦ Do not use a power module if its case becomes damaged, cracked, or broken or if you suspect that it is not operating properly.
- ♦ Replace the power module(s) with a manufacturer approved type only—non-Black Box power modules will not work with the power hub units.
- ♦ If you use a power extension cord with the module, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating.
- ♦ Also, make sure that the total ampere rating of all the devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.
- ♦ Both the unit and its power supply generate heat when in operation and will become warm to the touch. Do not enclose them or place them in locations where air cannot circulate to cool the equipment. Do not operate the equipment in ambient temperatures exceeding 50° C (122° F). Do not place the products in contact with equipment whose surface temperature exceeds 50° C (122° F).

RADIO FREQUENCY ENERGY

A Category 5e (or better) twisted pair network cable must be used to connect the units in order to maintain compliance with radio frequency energy emission regulations and ensure a suitably high level of immunity to electromagnetic disturbances.

UNITED STATES FCC RADIO FREQUENCY INTERFERENCE (RFI) STATEMENT

This equipment generates, uses, and can radiate radio-frequency energy, and if not installed and used properly, that is, in strict accordance with the manufacturer's instructions, may cause interference to radio communication. It has been tested and found to comply with the limits for a Class A computing device in accordance with the specifications in Subpart B of Part 15 of FCC rules, which are designed to provide reasonable protection against such interference when the equipment is operated in a commercial environment. Operation of this equipment in a residential area is likely to cause interference, in which case the user at his own expense will be required to take whatever measures may be necessary to correct the interference.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

CANADIAN DEPARTMENT OF COMMUNICATIONS RFI STATEMENT

This equipment does not exceed the class A limits for radio noise emissions from digital apparatus set out in the radio interference regulations of the Canadian Department of Communications.

Le présent appareil numérique n'émet pas de bruits radioélectriques dépassant les limites applicables aux appareils numériques de la classe A prescrites dans le règlement sur le brouillage radioélectriques publié par le ministère des Communications du Canada.
