

Monitor Work and Materials in Challenging Manufacturing Environments

Ultra-Rugged Engineering for Demanding Environments

Built to withstand heavy use in a wide variety of harsh conditions, RFD90 Ultra-Rugged UHF RFID Sleds are tested for drops up to 6 feet (1.8 meters) onto concrete surfaces and sealed against dust and water with industrial-grade IP ratings up to IP65 (spray) and IP67 (full submersion).

Industry-Leading Performance for Critical Tasks

With an impressive read rate of 1,300+ tags per second, RFD90 Sleds capture more tags in less time, enabling fast, precise inventory counts at ranges up to 75 feet (22.8 meters)*. And the ultra-accurate item-finder mode enables workers to locate critical items quickly and easily.

Ergonomic Design for Comfortable Use

Superior ergonomics including a balanced design, wide handle and low center of gravity contribute to worker comfort and productivity by reducing strain from continuous use over long shifts.

Versatile Functionality for Multiple Workflows

The tri-function user-programmable trigger offers easy access to RFID reading, barcode scanning and other features appropriate to the demands of your workflows.

Flexible Connectivity for Diverse Fleets

Changeable eConnex™ adaptors and charging cradles support a variety of rugged Zebra mobile computers, while the OtterBox uniVERSE adaptor accepts popular third-party smartphones and Bluetooth® 5.3 wireless capability connects almost any Android™, iOS or Windows device.

Wireless Capability for Easy Management

Built-in Wi-Fi 6 enables remote device management even when the sled doesn't have a mobile computer or smartphone attached, so admins can deploy firmware and configuration updates without having to touch every device.

Ideal for Manufacturing Applications

- Raw materials inventory
- Pipeline/utility tracking
- Item locating
- Inventory/cycle counting
- Work in progress (WIP) tracking
- Returnable transport object (RTO) tracking

* 75-foot (22.8-meter) read range available on the extended-range RFD9090 Ultra-Rugged UHF RFID Sled.
