

Introducing the DIN Rail Industrial UPS

Designed to deliver reliable power and battery backup to computing, networking, control and storage equipment, the [Eaton DIN rail industrial UPS](#) withstands the demanding conditions of industrial environments.

Eaton's DIN rail UPS is available in four models, including 500VA/300W and 850VA/510W AC power variants and 240W and 480W DC power variants. AC models are compatible with Eaton's all-new [PowerAlert](#) Office software for UPS monitoring and control.

Additional capabilities of the DIN rail UPS include:

- Compatibility with DIN rails, NEMA enclosures, DIN rail switches and USB
- Terminal block connections and IP20-rated screw terminals
- Self-test capability, battery indicator and remote on/off assist normal operation and control
- Replaceable or expandable battery options
