New product announcement

TRIPP LITE SERIES

Safeguard home and office electronics

New surge protectors!

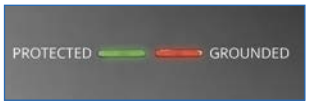

Reliable surge protection and line noise filtering

Eaton's Tripp Lite series surge protectors are your best defense against power surges and spikes that can ruin valuable electronics. EMI/RFI line noise filtering helps devices perform better and last longer.

Our new surge protector models offer a variety of outlet configurations, cord lengths and features that are perfect for home and office environments.

Diagnostic LEDs

Protected LED indicates protection is present. Grounded LED (select models) confirms the wall outlet is properly grounded.

Data line protection (select models)

Telephone, network and coaxial connections are protected against power surges.

USB charging ports (select models)

USB-C and USB-A ports power and charge USB devices.

On/off switch (except direct plug-in)

On/off switch with integrated circuit breaker allows one-touch control over connected equipment.

Automatic shutoff

Power to outlets is permanently cut if the protection circuit is incapacitated, preventing equipment damage and indicating replacement is required.

Convenient mounting

Bottom-panel mounting slots allow easy installation on a desk or wall.

Braided input cord (select models)

A braided jacket gives the cord extra durability for everyday use.

Right-angle input plug (select models)

The flat plug allows the cord to run parallel to the wall, providing more options for furniture placement.

Why choose Tripp Lite series surge protectors?

- Wide variety of options, including data line protection and USB charging ports
- Limited lifetime warranties, the best you'll find anywhere
- Up to $500,000 Ultimate Lifetime Insurance for connected equipment
