Overview

Feedback

The CT37 delivers a lightweight, user-friendly design that is built on the Mobility Edge™ platform, ensuring continuous productivity for front-line workers in retail, logistics, and healthcare.

The Mobility Edge™ platform is a durable, stable, secure foundation for which businesses build solutions around. The CT37 features a future compatible architecture that protects your investment, with Android support out to A18.

The housings on the CT37 are disinfectant ready and designed to withstand multiple cleanings from a variety of harsh cleaners. The housings stand up to multiple cleanings an hour by 34 different chemicals.

The CT37 is equipped with the latest 5G and Wi-Fi 6E technology, keeping you connected indoors and outdoors. 5G keeps mobile workers connected with the highest bandwidth and lowest latency available, reducing downtown and increasing productivity. The CT37 supports private 5G, CBRS, and Wi-Fi 6E, ensuring front-line workers stay connected.

Combined with powerful Honeywell software such as Operational Intelligence, Smart Talk unified communications and Smart Pay contactless payment, the CT37 is an ideal platform for users in retail, healthcare and transportation and logistics to build effective solutions.

With its hot-swappable battery feature, the CT37 eliminates interruptions for battery replacement, making it possible for extended operational use without downtime.

The CT37 also includes a secure element (SE) for preventing digital threats, adding a layer of physical security to the device. It ensures that sensitive information processed by applications on the SE is insulated and secured against unauthorized access.
