Getac

A140
Handle
User Guide

Introduction

This handle serves as:

- Carrying handle
- Stylus slot

Stylus slot —

Installation

1. Four rubber plugs and six screws should be removed before the installation. Use a flat-head screwdriver as a tool to pry the rubber plugs out of the holes. (The plugs and screws will not be needed for the installation.)
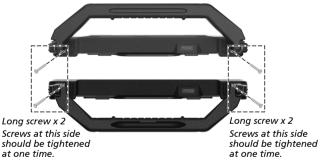

2. Noting the orientation (stylus slot in the front), attach the handle to A140.

3. Secure the handle with the supplied screws (two different lengths).

   Tighten the short screws on the left and right sides (three screws at each end).

Short screw x 3

Stylus slot in the front

Short screw x 3

Tighten the long screws on the top (two screws at each end). Turn the handle to access the screw holes. Complete the tightening of two screws at one end first. Then proceed with the other end.

Long screw x 2
Screws at this side should be tightened at one time.

Long screw x 2
Screws at this side should be tightened at one time.
