

SEAMLESS Kitted Universal Series

*Actual configuration may vary

ENG Installation video for reference only.
Read and follow instruction manual for full installation.

⚠ WARNING

This product is designed to be installed on plywood walls. Hardware is included for plywood installation. This product is designed to be installed on flat, unobstructed, vertical walls. Do not install on curved or angled walls. Before installing make sure the supporting surface will support the combined load of the equipment and hardware. Screws must be tightly secured. Do not overtighten screws or damage can occur and product may fail. Never exceed the Maximum Load Capacity. Always use an assistant or mechanical lifting equipment to safely lift and position equipment. This product is intended for indoor use only. Use of this product outdoors could lead to product failure or personal injury. Be careful not to pinch fingers when operating the mount. For support please call customer care at 1-800-865-2112.

Symbols

Tools Needed for Assembly.

Parts (Before beginning, make sure you have all parts shown below). *Refer to parts list included with your model.

Parts List	
Description	Qty.*
A latch assembly	
B 4' horizontal extrusion	
C wall plate	
D depth adjustment bracket	
E connector plate	
F -	
G #14 x 1.75" wood screw and 1/4" SAE washer	
H M5 cup washer	
I M5 flat head screw	
J M6/M8 cup washer	
K M6 flat head screw	
L M8 flat head screw	
M M10 socket cap screw	

Parts List	
Description	Qty.
N spacer	2
O 3mm allen wrench	1
P wall plate shim	10
Q 4mm allen wrench	1
R spacer extension	2
S M5 flat head screw	8
T 1/4" flat washer	8

DS-LEDUNVSPACER Kit:
Included with preconfigured models and also sold separately.

1-1

If display model is not listed on table in the following step, use formula provided to calculate the "A" dimension.
 Y^* = bottom of display tile to top pair of mounting holes on back of display.

$$A = Y^* + 2.39" \text{ (61mm)}$$

1-2

See table and drawing below for dimensions that will locate mount on the wall.

Compatible Display (Width x Height)	Bottom of video wall to top of first wall plate Dimension A	Side of video wall to center of first wall plate Dimension B	Center to center wall plates Dimension C	System Depth Range Dimension D

ENG This page intentionally left blank.

2

Optional: connecting two horizontal extrusions.

2-1

Determine the required extrusion length with the following extrusion cut to length formula:

$$\text{Video Wall Width} - 0.25" (6\text{mm}) = \text{Extrusion Length}$$

2-2

Now that the extrusions are cut to length, separate the extrusions and slide wall plates onto extrusions and tighten with the wall plate fully extended (one wall plate per display unless the display is >960mm wide, in which case there will be two wall plates per display).

⚠ WARNING

When installing Peerless wall mounts on a wood stud wall covered with plywood, verify that the wood studs are a minimum of 2" x 4" nominal size and plywood is a minimum Grade BC, 1/2" (13mm) thick. Plywood may be covered by gypsum board (drywall) up to 5/8" thick.

2-3

Install the bottom row, first extrusion assembly, on the laser line per table (step 1), dimension "A". Install additional bottom row extrusions one at a time using connector plates to join extrusions. Drill mounting holes and install screws and washers with top edge of the wall plates on the laser line.

3

Determine the height of the display being mounted and locate the same dimension on the front of the spacer. If the display height is above 540mm, add the spacer extension. If display height is not listed on the spacer, measure the display to set custom spacing.

$X > 540\text{mm}$

$X \leq 540\text{mm}$

$X = \text{Not listed}$

3-1

Add the extension for displays taller than 540mm. Move the spacer bracket and clamp to the lower extension.

4a

Move spacer bracket and clamp to the desired display height. This may require adjusting the pins of spacer bracket.

4a-1

Optional: Remove and replace pins to align with correct display height.

4b

If the display height is not listed on the spacer, measure the display to set the spacing.

5

Install remaining extrusions using the spacers. Clamp the upper spacer jaw assembly to an uninstalled extrusion assembly. Clamp the bottom spacer jaw assembly to the installed extrusion. Vertically align extrusions with a laser. Drill mounting holes into supporting surface and install wall plates to the wall.

6

Loosen clamps and remove spacers.
Repeat steps above to install the next extrusion.

Engage and secure connector plate to mounted extrusions. Secure wall plates to wall. Remove spacer when extrusions are fully secured.

7

Set a laser level so that it is parallel to the mounting surface (wall). Measure to the face of the extrusion so that all points of the extrusion are the same distance from the laser line, creating one flat plane across the face of the mount. Tighten screws.

Double check using a straight edge to span three extrusions. Adjust low and high spots as needed.

8

If mounting hardware is preinstalled, remove and replace with hardware provided.

9

Hook display cabinets onto horizontal extrusion, adjust height to level and join cabinets together using connecting system. Adjust plumb, close latch, then run cables one at a time starting from left to right.

HEIGHT ADJUSTMENT

CLOSE LATCH TO SECURE

Optional:

OPEN LATCH TO ENGAGE EXTRUSION

9-1

Hook display cabinets onto horizontal extrusion, adjust height to level and join cabinets together using connecting system. Close latch, then run cables one at a time starting from left to right.

Optional: Height adjustment screw can be removed from top row displays.

9-2

To remove, start from the top right. Open latch assemblies, disconnect cables, separate cabinets and remove displays one at a time.
