

Lenovo™ recommends Windows Vista™ Business.

ENGINEERED LIKE THERE'S NO YESTERDAY.

THINK FAMILY PCs AND ACCESSORIES

lenovo™

Lenovo™ recommends Windows Vista™ Business.

BE GLAD OUR ENGINEERS USE THEIR POWERS FOR GOOD.

At Lenovo, we never stop innovating. Every technological breakthrough or benchmark-setting quality standard we achieve is simply another challenge to do better. Push further. Design and build PCs that are faster, lighter, more intuitive and more capable than ever before. It's this abiding distaste for the status quo that makes ThinkPad® notebooks and ThinkCentre® desktops the best engineered PCs in the world.

Considering that maintenance costs and productivity lost to IT issues can add up to 80% of the total cost of PC ownership, it's easy for ThinkVantage™ Technologies to change your business for the better. And to make life easier, we also have a free 60-day trial of Microsoft® Office 2007 on all Windows Vista™ models. Whether by protecting data, empowering end users or improving productivity, you'll be grateful the engineering minds that developed them are on your side.

ThinkVantage Client Security Solution

Encrypts data on your hard disk drive quickly and easily to help prevent unauthorised access. By replacing multiple sign-ons with a single passphrase, ThinkVantage Password Manager simplifies access while helping to reduce password-reset costs. Combine that with an Integrated Fingerprint Reader and you get the strongest standard-feature PC security available.

ThinkVantage ImageUltra™ Builder

Combines multiple languages, applications, operating systems and platforms into a single, stable image to help reduce testing, deployment and support time and costs.

ThinkVantage System Update

Automatically checks for and loads the most recent versions of drivers, firmware, even third-party software, for improved security and performance.

ThinkVantage Rescue and Recovery™

Backs up data and provides a user-friendly, pre-boot diagnostic-and-recovery interface that helps users preserve settings and get recent data back to a previously saved state fast.

ThinkVantage Productivity Centre with Away Manager

Lets you keep up with maintenance tasks like virus scanning—without sacrificing productive time—by automating and performing them while you're away.

ThinkVantage Access Connections

Automatically switches among saved settings to provide the easiest wired and wireless connectivity of any notebook brand, letting you connect to available networks and devices—from wherever work takes you.

ThinkVantage Active Protection System

Works in just 500 milliseconds to detect certain types of falls. It parks the hard disk drive to help prevent data loss that sometimes results from common bumps and bruises.

ThinkVantage System Migration Assistant™

Helps save time during deployment by automatically migrating users' system preferences, including data, settings, favourites and more.

ThinkVantage Secure Data Disposal

Makes the removal of confidential information from a disk drive fast and simple, helping ensure that any critical data is permanently removed from a PC before it is disposed of.

LANDesk® for ThinkVantage Technologies

Provides a central location from which you can customise and manage ThinkVantage Technologies for your desktop and notebook clients.

Great performance is worthless without good looks, sleek lines and technological wizardry to back it up. That's the philosophy behind ThinkVantage designs. Instead of arbitrary styles or finishes, Lenovo designs the outside as thoughtfully and purposefully as the inside.

Titanium composite covers

Make select ThinkPad notebooks more durable.

Dual smart-latch and wide-set hinges

Enable single-handed opening and more secure closing of ThinkPad covers.

UltraConnect™ antenna

Built into the display cover to help optimise frequency coverage and performance for wireless LAN connectivity. Integrated wireless WAN keeps you connected, even when you're not in a hot spot.

All-steel chassis

On all ThinkCentre models, to support large-screen TFT flat-panel and CRT monitors, as well as protect your investment.

Easy-to-service desktops

With toolless cover removal, flip-up bays, pop-out parts and rail-riding components on select models.

Tamper-alert switch

Warns you when a desktop cover has been opened (select models).

ThinkPad Roll Cage

Surrounds your notebook's vital components—just like its motor sports namesake—protecting against damage associated with many shocks and drops (select models).

ThinkPad Spill Resistant Keyboard

Features drain holes to divert spills through the machine, away from the battery and motherboard.

Key Benefits	Widescreen displays that add up to 25% more viewable area and enhanced multimedia features like an integrated video camera make these models ideal for multi-taskers on the move.	Rock-solid computing at a price the accountants will love. Made for frequently mobile travellers who need versatility, power and portability—all at an affordable price.	The reference standard for security, portability and performance—in the office, on the road and everywhere in between. Mobile workstations pack extra graphics capability and extended battery life.	A thin and light convertible for those who value uncompromising tablet and notebook functionality. And those who refuse to sacrifice portability, keyboard and screen size or docking capability.	Full expandability and a full-size keyboard provide full-featured comfort and capability. Yet ultralight and ultrathin designs mean highly mobile users can power through the day without missing a step.
