

## **W. Ralston 2900 Series are EcoLogo Certified The EcoLogo™ Program CCD-126 for Garbage Bags**

W. Ralston 2900 Series is committed to improve environmental quality:

- by reducing energy
- by reducing materials consumption
- by reducing the impacts of pollution

### **W. Ralston 2900 Series Garbage Bags**

- Meet government and industry safety and performance standards.
- Meet requirements of Fisheries Act and the Canadian Environmental Protection Act (CEPA) for manufacture and transport.
- Use Non-toxic inks.
- Contain post-consumer material.
- Contain household post-consumer material.

"household post-consumer material" means material collected from curbside and depot collection programs serving individual households and apartments.

"post-consumer material" means a product which has served its end-use at the consumer level, has been discarded by the consumer, and would, unless diverted, enter the waste stream. This includes household post-consumer material.

"recycled material" means post-consumer material and pre-consumer material. It does not include byproducts of an industrial process that can be, and regularly are, used in either the same process, or in a different process, except that proportion which originated as post-consumer material and pre-consumer material.

Jan 26, 2010.

To Whom it may concern:

W. Ralston **Ecologo Certified Garbage Bags CCD-126** contain a minimum:

- 10% post consumer industrial resin. (such as discarded pallet wrap)
- 10% post consumer household resin. (typically from residential blue box collection programs)

These recycled resins are often discoloured , especially those used for manufacturing clear type transparent bags.

The discolouration will be visible in the finished product, giving the transparent bag a slight tint of colour.

That colour tint will vary from batch to batch, a result of the batch processes for recycling plastic film collected at recycling centres.

This slight discoloration does not affect the overall performance or quality of the transparent bags.

## INDUSTRIAL AND INSTITUTIONAL CAN LINERS & GARBAGE BAGS

www.cttgroup.com

W. Ralston Canada operates manufacturing facilities in Eastern and Western Canada serving both the retail and industrial markets. Ralston is a leading manufacturer of Trash Bags, Can Liners, Films and Vapour Barriers with product innovation such as blends of virgin & recycled plastics, antibacterial agents, and certified compostable plastics.

*Ralston is committed to ongoing product development in positive support of solid waste management issues.*

### 2100 Series

#### Compostable

- Certified compostable by BNQ 9011-911 and BPI ASTM D6400

### 2400 Series

#### Food Grade

- Clear
- Approved for food contact by Agriculture Canada

### 2500 Series

#### Premium Black

- Virgin rich blend of recycled post industrial LLDPE and premium
- Hexene Resin
- The 2500 Series is our thickest line

### 2600 Series

#### Value Plus - Black

- Economical lighter gauge
- Recycled resin
- EcoLogo™ - Certified Garbage Bags CCD-126

### 2700 Series

#### Recycled - Black

- Similar to the 2500 Series
- Lighter gauge with a higher content of recycled resin

### 2800 Series

#### High Density - Frosted

- Made from quality high molecular weight - high density resin
- These bags have exceptional strength and are ideal for heavy, wet trash.
- Packed in mini-rolls

### 2900 Series

#### Transparent and Colours

- Made from Hexene resin allowing significant downgauging, while still maintaining superior characteristics
- Transparent is EcoLogo™ - Certified Garbage Bags CCD-126

Ralston Quality Plastics  
100%  CANADIAN

Each Series has its own unique formulation providing the broad spectrum of qualities and economies necessary to satisfy this demanding market.

- Complete range of sizes.
- Available in different colours (2900 Series).
- Outstanding elongation and tear characteristics.
- Custom sizes and colours also available.

#### User Friendly Cartons!

- Unique one-at-a-time end dispensing cartons allow easy access and ease of stacking.
- All cases have colour coded wrap around labels clearly identifying series, size, count, colour and strength.
- All linear low density series case counts are the same by strength and size.
- Cartons are 70% recycled material with minimum 50% post consumer.
