

Part Number: V1200-P, V1200-QP, V1206-P
Part Number for Fiber Connectivity: V1200-PF, V1200-QPF

V1200 Series Zero Clients for VMware Next-Generation Tera2 PCoIP Portal Processor

The V1200 Series is 10ZiG's next-generation TERA2 PCoIP Zero Client. This device supports the efficiency and security of centralized computing and offers an uncompromised desktop experience. The V1200's latest chip set (TERA2 PCoIP Portal Processor) delivers a powerful, secure and easy to manage PCoIP Zero Client. These Zero Clients offer a seamless solution with dynamic features and a performance that will meet the needs of any expanding VDI environment.

Specifically designed with a small footprint, the V1200 Series only consumes between 6-12 watts of power. This is half the power of the previous generations, thus helping any organization lower their power consumption and general virus exposure resulting in a much lower total cost of ownership.

The Zero Client eliminates the need for running, managing, maintaining or securing enterprise desktops while still delivering high end user elements. With up to 6 USB ports, rich multimedia playback, HD audio and multiple monitor support, the V1200 Series is the perfect fit for any VMware VDI environment.

▶ TERA2 PCoIP Portal Processor	▶ Best Multi-Media Experience Available
▶ 2x 2560x1600 or 4x 1920x1200 Res	▶ VESA Mounting Capability
▶ Dual/Quad Monitor Support	▶ Free Centralized Management
