

Belkin Advanced Secure 2-Port Flip KVM Switch

Security. Convenience. Control.

The Belkin Flip KVM Switch is the first secure KVM in the industry specifically designed for 2-isolated network environments.

Many Federal/Secure Desktop users are required to switch between two isolated networks and call for a KVM solution that is both secure and cost-effective.

Belkin's Flip KVM Switch addresses these needs with its small form factor and secure switching.

The Flip KVM switch enables users to securely switch between two sources while presenting information from each source at a time.

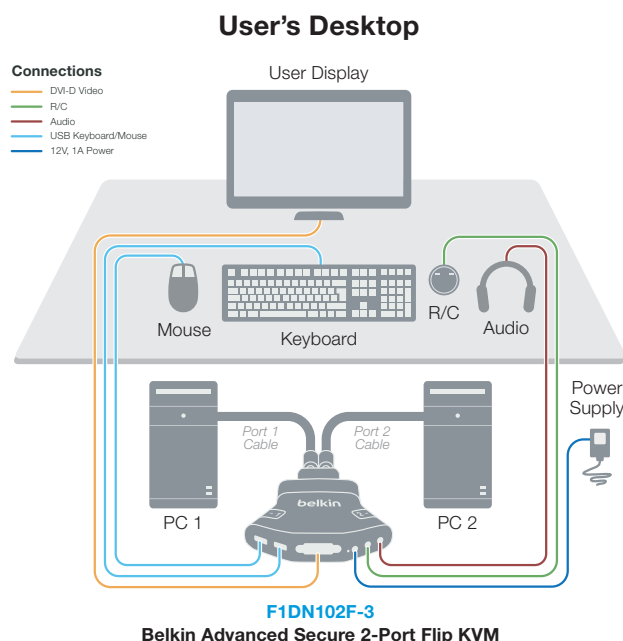

The Flip KVM switch securely toggles control of video, keyboard, mouse and audio between the two sources allowing navigation by selecting the switch push buttons or controlling it remotely via remote control device. The product supports all operating systems: Linux, Mac OS and Windows.

Belkin's Flip KVM targets any organization with Secure Desktops, such as government agencies, defense, intelligence and finance.

The products are compliant with latest NIAP Protection Profile 3.0 which exceeds EAL4+ PP2.1.
