

**Bluetooth to Ethernet network access point**

Establishes and manages up to 5 concurrent Bluetooth to Ethernet connections for hand-helds or tablets requiring a wired Ethernet connection when WIFI is not preferred or possible.

**Adapt an Android bluetooth connection to Ethernet**

- Pair as many devices as desired
- Supports 5 concurrent Bluetooth connections to one Ethernet
- Support for most Android hand-helds and tablets
- Bluetooth SIG certified for reliability and performance

**Bluetooth implementation**

- 10 meters / 30 feet, line of sight, Class 2 radio. Obstructions and interference will affect the range.
- Ubiquitous Bluetooth 2.1 allows Portsmith to bring to market a product with a robust and proven Bluetooth firmware.

**PIN authentication**

- For extra security, no PIN is programmed into the daptaPort Bluetooth at manufacturing. daptaPort Bluetooth will become fully functional when the end user sets a PIN.
- PIN is established and programmed into the daptaPort Bluetooth at initial setup by the end user via the Portsmith PortDox management application
- The only party having knowledge of the PIN is the person setting the initial code

**Certifications**

- FCC Class B, CE Mark, UL Mark
- Certified for use in North America, Europe, Australia, New Zealand, Japan

**Dimensions and weights:**

2.5w X 4.2d X 1.3h inches

Approx. 200g

**Portsmith portDox management application**

- Windows application running on the same network as the daptaPort Bluetooth facilitates interrogation and configuration of the daptaPort Bluetooth.
- Provides ability to set daptaPort Bluetooth PIN and:
  - Manage the number of devices paired
  - List of devices connected
  - MAC addresses of daptaPort Bluetooth and connected devices

**Kit Contents**

daptaPort Bluetooth adapter

5V power supply with AC adapter plugs for worldwide use

Ethernet cable

**Pricing**

\$299 MSRP
