- Ships fully assembled to allow for immediate use

Optional Accessories

- Powered wipeable 6W + 6W stereo Bluetooth speaker
- Rugged antimicrobial cases
- Custom design options: color, height, and more.

About Tryten Medical

For healthcare professionals patient care is top priority. At Tryten Medical, our essential intent is to provide reliable and secure medical solutions to support these healthcare professionals. Since the year 2000, we have worked closely with hospitals, medical facilities and other organizations within the healthcare sector, identifying security threats to technology equipment and other confidential data stored on premises.

Recent national and international policy reforms, including Patient Protection and the Affordable Care Act (PPACA), have created both the opportunity and need for more value-based health care. The creative application of technology within medical environments is rapidly expanding as healthcare providers continue to find cost-reduction solutions. The technology revolution e.g. monitors, smart phones, computers, along with the internet and social media have helped bring about the evolution of value-based care. For over 20 years, Tryten has been an industry leader in secure technology solutions for many industries including healthcare.

We are also sensitive to a patient's need for confidentiality and the healthcare industry's ongoing challenges to safeguard it. Computers and peripherals used in healthcare facilities are often left unattended and therefore highly vulnerable to theft and tampering. The innovative design team at Tryten has developed products that lock, mount, secure, and enclose technology equipment providing you with peace of mind to do what healthcare professionals do best: patient care.

As a result, product development focuses on improving caregiver workflows while seamlessly integrating technology to the advantage of patient care. As the industry-leading provider of tablet medical solutions for healthcare facilities striving to provide world-class patient care, security and staff efficiency, we design our medical carts to be minimalistic, ergonomic, and secure.

At Tryten Medical, we help connect patients and providers for collaborative care.
