

BE330362KM BI Oven

Added steam for great taste, texture and colour

The SteamBake function on this oven adds steam at the beginning of the baking process. The steam cooking keeps the dough moist on the surface to create a golden color and tasty crust on your bakes, while the heart stays soft and tender.

Higher performance and more energy efficient

The Hot Air Fan System ensures hot air circulates evenly throughout the oven cavity, for a cooking process that is faster, and more energy efficient.

Improved access to enable thorough cleaning

The glass door of this oven can be completely removed, which provides better access for cleaning the oven even more thoroughly.
