

The VisionTek Mini DisplayPort to DVI-D SL active adapter allows you to connect your favorite mDP device to your single link DVI display or projector. This active adapter works without any additional power or drivers. Watch movies in perfect 1080p clarity or tackle your most demanding software applications across multiple displays. The adapter allows ample length so you can configure your desk or presentation setup however you wish.

Unlike passive adapters, this mDP to DVI converter offers an active chipset for compatibility with any Mini DisplayPort output - ideal for graphics cards and devices that do not support outputting multi-mode DP++ signals (e.g. AMD Eyefinity). The mDP to DVI active adapter requires a DVI cable (sold separately).

PN 90916 | UPC 7 84090 03515 8

NOTE: This adapter is not bi-directional. This adapter converts Mini DisplayPort to DVI-D only, not vice-versa.

VisionTek Display adapters offer a quick solution for your display needs. Our adapters work across all operating systems including OS X, Linux and Windows XP, Windows 7, Windows 8, and Windows 10. Where necessary, our adapters are active for expanded compatibility with multi monitor displays, docks, and digital signage. AMD Eyefinity is also supported with our adapters. Each VisionTek adapter has been extensively tested with HP, Dell, Lenovo and Mac systems to ensure a wide range of system compatibility.
