

Canon's first ultra-wide L-Series lens with built in Image Stabilizer

Expand your range of photographic expression with the EF 16-35mm f/4L IS USM, Canon's first full size wide angle zoom lens with a built in Image Stabilizer. This lens features a dust-proof, drip-proof construction, so you can shoot with confidence in the harshest conditions. With an UltraSonic Motor for fast and silent Auto Focus, the EF 16-35mm f/4L IS USM is a great companion to your full frame DSLR, when shooting wide angle or landscape scenes.

Key Features

- 3 aspheric lenses (GMO), including a large-diameter aspheric lens, and 2 UD lenses provide a higher level of image quality from the center to the screen periphery throughout the zoom range
 - First wide-angle full-size zoom lens among EF lenses to carry the IS function
 - Image Stabilizer equivalent to a shutter speed 4 settings* faster (focal length 35 mm, using an EOS-1D X)
 - Achieves a shorter overall length and lighter weight than same-class models, while providing higher image quality
 - Image Stabilizer Coatings are optimized to minimize ghosting
 - Inner focusing ring and UltraSonic Motor (USM) for silent, fast AutoFocus
 - Fluorine coating on foremost and rearmost lens surfaces.
- * Based on CIPA standards
