

Storage and Sharing. Reinvented.

The ultimate storage device. Apollo Cloud is a powerful personal cloud storage device giving you access to all of your content from anywhere using the Apollo Cloud App.

Take Control of Your Content

The all new Apollo Cloud App lets you share, backup and sync your content from multiple devices and multiple platforms. Add up to 40 members to create a private social sharing cloud with no monthly fees.

Albums based on facial recognition and location

The Apollo Cloud App automatically creates albums from your images and places travelled. It's never been so easy to catch your best memories!

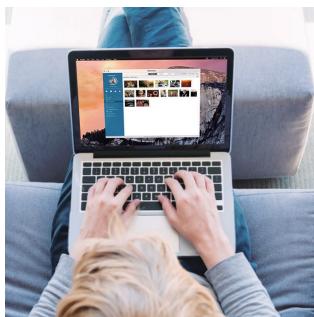

Simple to Setup

- 1 Use your smartphone to scan QR code.
- 2 Enter your email address and password.
- 3 That's it! Start using your new Apollo Cloud.

One-click Camera Roll Sync!

With the swipe of a finger, all your images from your device will be uploaded to Apollo. Giving you the freedom to create space on your device for more photos and videos.

Backup

With Apollo, there should be no excuses why you did not backup. Whether you are on a Mac or PC, Apollo makes it easy. It is so easy you can even backup to your Apollo from anywhere in the world over the internet.

Share Content Privately or Publicly

Share your files with family, friends or co-workers. Apollo allows for up to 40 members per Apollo or share files publicly to an unlimited amount of people with time limited links.
