

GKB710L

Kaliber Gaming MECHLITE Mechanical Gaming Keyboard

Enjoy the exceptional feel and response of mechanical key switches, plus a host of other hot gaming features for a price that won't break the bank.

Mechanical Gaming Keyboard

Kaliber Gaming's MECHLITE Mechanical Gaming Keyboard combines the exceptional feel and response of mechanical key switches with the must-have features gamers demand most. The MECHLITE is first and foremost a professional level keyboard, with a fully mechanical design that was previously out of reach for most gamers. Even with the high cost of mechanical key switches, Kaliber Gaming has still managed to add LED backlight with adjustable brightness and a host of other features for a price that won't break the bank. The MECHLITE's blue style mechanical keys provide a slightly resistive feel and a 'clicky' sound, giving gamers that assurance of positive engagement. Add all 104 anti-ghosting keys with full N-Key Roll Over, 5 macro enabled keys, Windows® key lockout, WASD/arrow key swap, plus multi-pattern blue LED backlighting and you are ready to start toasting the competition!

Full Mechanical Keys

The MECHLITE is available with your choice of blue, brown or red type mechanical switches so you can choose the keyboard feel that best fits with your play style and typing preference. Blue switches (GKB710L) provide a slightly resistive tactile feel with a bump-like actuation point that makes discernible click when pressed, giving gamers that assurance of positive engagement. Brown switches (GKB710L-BN) are quieter (non-clicky) and require slightly less actuation force than blue switches for a lighter overall feel. Red switches (GKB710L-RD) are also quieter than blue switches and feature a linear design that provides the same smooth, solid feel throughout the full travel of the keystroke. Mechanical keys have the advantage of not requiring to be fully depressed for proper registration. Now you can game faster and with less hand fatigue than ever before!

- Mechanical key switches provide the fastest response and best tactile feel
- 5 programmable macro keys with up to 32 characters each
- Blue-style 50-million cycle switches with 'click' style feedback
- Anti-Ghosting keys with full N-Key Rollover so you never miss a keystroke!
- Blue LED backlight with adjustable brightness
- 7 LED backlight patterns
- W-A-S-D key functions swappable with arrow keys for MMO gamers
- Windows key lockout prevents accidental pop-ups while gaming
- All key lockout prevents unintended keystrokes during game breaks
- Laser cut key illumination with matte finish keys provides resistance to natural finger oils
- Braided USB cable jacket
- Heavy weight keyboard base for added stability when typing or gaming

Requirements

- Windows® 10, Windows® 8.1, Windows® 8, Windows® 7, Windows Vista®
- USB Port

Package Contents

- 1 x GKB710L
- 1 x Quick Start Guide
- 1 x Warranty Card
