Description: The I10140L provides real-time power metrics to help prevent overloads and safely optimize load levels.

Using Visible Light Communication (VLC) technology, I10140L optically transmits power usage data from its LED display to a handheld device over the Geist Mobile App, presenting comprehensive real-time power usage data down to the phase and circuit levels. With the Geists Upgradeable hot-swap technology, users may easily transform Metered PDUs to Monitored by replacing the Interchangeable Monitoring Device (IMD)

 $module, without \ causing \ any \ interruption.$
