DISCLAIMERS

SPECIFICATIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE. ALL VIEWSCREEN AND OUTPUT IMAGES ARE SIMULATED.

- 1 30 ink cartridge sets is based on print yield of the included black and color ink bottles as compared to the following standard-capacity cartridge sets: PG-245 Black Ink Cartridge and CL-246 Color Ink Cartridge as of April 2019. Ink value based on MSRP (USD) of equivalent cartridge sets.
- 2 Page yield of included ink bottles used for initial setup is lower than the replacement ink bottles, as a certain amount of ink is consumed to fill into the print head during setup (charging the print head initially). Page yield is the estimated value based on Canon individual test method using the ISO/IEC 24712 chart and continuous printing simulation with the replacement ink bottles after initial setup. Page yield of color inks is an average yield of cyan, magenta and yellow inks combined. Page yield varies significantly depending on content printed, ink levels maintained in all four reservoirs, and other factors. Up to 6,000 (black)/7,700 (color) printed page yields are approximate, based off document pages printed.
