CyberMed PX Monitor Series

Certified Medical Grade Monitors

Because Medical Grade Matters

The CyberMed PX series of monitors comes in screen sizes from 19" - 24" and all feature optional touch screen capabilities. The PX monitors feature antimicrobial housings, are IP65 rated for easy cleaning and disinfecting, and are IEC/UL 60601-1 certified for near patient safety.

Medical Grade Certified

Antimicrobial*

The CyberMed PX Monitors includes an antimicrobial housing to protect itself from harmful microbes.

IEC/UL 60601-1 Certified

These medical monitors have been engineered to meet the stringent 60601-1 electrical and radiation safety standards required for near patient use.

IP65 Rated

A sealed, true flat front bezel is IP65 certified, so they will stand up to chemical disinfectants and makes it easy for medical professionals to clean.

*Antimicrobial technology protects the housing of the computer & tablet. Cybernet makes no direct or implied claims to protecting users or providing other health benefits.

Multiple Screen Sizes and Resolutions

The CyberMed PX series comes in 19", 20", 22", and 24" screen sizes featuring a variety of resolutions and aspect ratios. All four models feature HD quality screen resolutions. The PX 20 - PX24 all feature 16:9 aspect ratios, while the PX 19 supports a 4:3 aspect ratio. Whether you are integrating with legacy software applications or running the latest technology, we have a PX medical monitor capable of displaying your software as intended in vibrant HD resolution.
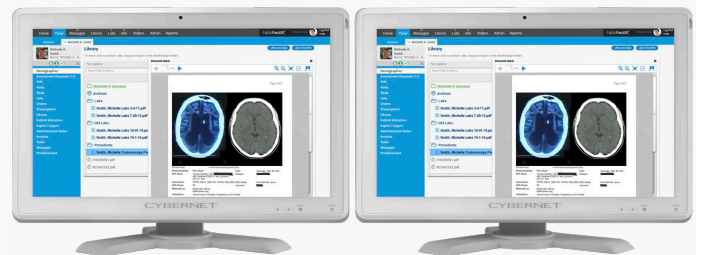

True Medical Grade

Unlike consumer grade monitors, the CyberMed PX series is certified medical grade. All of our monitors feature antimicrobial housings to protect itself from harmful microbes, IEC/UL 60601-1 certification for near patient safety, and IP65 ratings for easy disinfection. These are ideal for any sterile environment.

Built with Customization & Compatibility in Mind

In addition to having multiple medical grade certifications, the CyberMed PX medical monitors can be equipped with privacy or anti-glare filters. All models are VESA compatible and can be mounted on any standard medical cart or wall mount. Additionally, a 4k option is available on the 24" model.
