

## Liebert Condensate Pumps

**A Liebert precision cooling equipment purchase is an investment in leading-edge technology, quality and performance. Protect this investment, and improve performance, by using Liebert approved replacement parts, such as Liebert Condensate Pumps.**

Liebert Condensate Pumps are designed to operate with Liebert Humidifier, Steam Generator and Infrared Systems. Liebert Condensate Pumps are better than common replacement pumps because they are designed with:

- High-temperature housings
- Heavy duty check valves for higher reliability and reduced noise
- Dual floats
- Pre-wired connectors for fast, easy installation

### Key Features

- Engineered for heavy-duty pumping action.
- Superior impeller design, drawing condensate water from tank bottom (one (1) gallon sump capacity).
- Dual float (most models) shuts “off” unit and sends an alarm signal in cases of back-up or overflow.
- Pre-wired terminal block reduces installation time.
- Galvanized steel cover protects working components from contaminants.

Motor internally protected with stainless steel shaft

High Pumping Capacity

Motor bearings double-protected against water splash and steam vapor

Tank designed for 212° water

Fuse Protected

Built-in serviceable check valve

Pre-wired for Liebert equipment

Dual Float Protection
