

ECSE Design

Available Online or In-Person

This 4-day course consists of lectures and labs taught by Wi-Fi experts. Learn how to optimize, troubleshoot, and design Wi-Fi using Ekahau products.

Dive into all aspects of Wi-Fi lifecycle management including:

- ▶ RF fundamentals
- ▶ Predictive designs
- ▶ Optimizing Wi-Fi networks
- ▶ Capturing and analyzing survey data
- ▶ Spectrum analysis
- ▶ Design across all three bands, 6 GHz included
- ▶ And much more!

Course specifics:

- ▶ Updated in 2022 to include 6 GHz
- ▶ Designed for Wi-Fi engineers, architects, network owners, IT administrators, and other Wi-Fi and IT professionals
- ▶ Receive a highly regarded ECSE Design certification via our partner Credly upon passing the certification exam.
[\(Download exam objectives\)](#)
- ▶ Four-day format: 9:00-12:30, 1 hour lunch break, 13:30-17:00
- ▶ Training offered in English, French, German, Spanish, Dutch and Polish
- ▶ Scheduled to fit your time zone

Technical requirements:

During the course, students receive a temporary Ekahau Connect license to run Ekahau AI Pro on their computer and Ekahau Survey and Analyzer on their mobile device. Students will need:

- ▶ Admin rights on their local machine to install AI Pro
- ▶ A strong internet connection and a computer with video and audio capability
- ▶ A physical mouse rather than a trackpad for designing
