

POSShield

Professional, Affordable, and Adaptable Protection Designed for mPOS

Star Micronics is proud to offer the POSShield protective barrier as a part of its product portfolio for SMB retailers and restaurants.

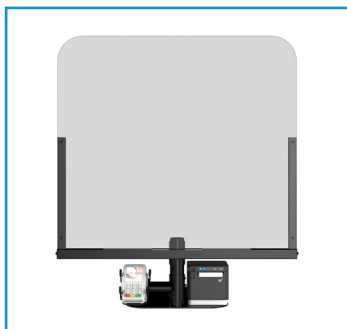

The POSShield, which acts as a sneeze guard and limits the spread of germs, is placed in between the cashier and the customer, and is comprised of a durable steel frame and a protective plexiglass partition. Measuring 30" wide and 33" tall, the POSShield is an ideal size for SMBs with limited counterspace, as each shield protects one cashier. Additional shields may be purchased to accommodate multiple cashiers. Designed for today's businesses, the POSShield is adaptable and compatible with any existing POS or mPOS terminal.

The POSShield features a sturdy base plate with no countertop mounting or drilling required, making it easy to install and relocate. With a focus on mobility and reusability, the POSShield can be easily reinstalled for future use cases including flu seasons, changes in store setup, and more. The gap in between the sneeze guard and the countertop enables the safe passing and scanning of products and can be adjusted to fit a cashier's needs. Payment pin pad terminals can be mounted to the pole if needed, and supplies are included to mount the shield to the countertop, if desired.

Features:

- Durable Steel Frame and Plexiglass Shield Construction
- Sturdy Base Plate, with No Countertop Mounting or Drilling Required
- Easy to Install and Relocate for Future Use
- Ideally Sized for One Cashier (30" Wide x 33" Tall) with Additional Shields Available for Purchase to Accommodate Multiple Cashiers
- Adjustable Gap Between Guard and Countertop Enables Safe Passing and Scanning of Products
- Payment Pin Pad Terminals may be Mounted to Pole
