

PAD-TRP

Rolling Tripod Floor Stand for 7-13" Tablets

CTA Digital's Rolling Tripod Floor Stand combines the convenience of a smooth-rolling tripod stand with the flexibility of a gooseneck and universal tablet holder. It's a great solution for classrooms, conference rooms, offices, and on-the-go content creation. A simple screw connection attaches a flexible gooseneck and holder to this tripod stand. It allows nearly endless angle adjustment as well as full rotation for use in either portrait or landscape orientation. A handy adjustment crank lets users raise and lower the height of the adjustable pole. The legs are also height-adjustable, giving a total maximum height of 69 inches. A knob at the bottom of the center pole allows adjustment of the width of the tripod legs. Optional wheels can be locked in place. Stow batteries in a handy cradle that connects to the center pole. The universal tablet holder grips diagonal corners snugly in place with rubber grips, and adjusts with a simple button switch. Compatible with iPad 7th-9th Gen. 10.2 inch, 11- and 12.9-inch iPad Pro, Zebra Tablets, Surface Pro 7, Samsung Tablets and cases up to 1.06 inches in total thickness

Features:

- Easy toggle clips extend and retract legs for maximum portability
