Wall-Mounted Infrared
Non-Contact Forehead and Body Thermometer

The Diamond Wall-Mounted Infrared Non-Contact Forehead and Body Thermometer is a quick, convenient and accurate way to measure body temperature. Place it on a wall in an office lobby or building entrance. It's great way to ensure safety among employees and staff.

Displays Different Modes in Temperature

Diamond Wall-Mounted Infrared Non-Contact Forehead and Body Thermometer easily switches between Celsius and Fahrenheit degree readings. The infrared lens reads precisely and quickly.

Temperature Display Settings

Temperature display settings with the touch of one button. Large, bright LCD readings make taking body temperature quick, accurate and easy.

Sound and Light Alarm System

Easily set the alarm. When body temperature gets too high, the red light will flash and the alarm will sound loudly.

- NON-Contact Measurements
- Accuracy: ±0.2 degrees
- Quick and Accurate
- Body Temperature
- Automatic measurement:
  measuring distance: 1.97in ~ 3.93in (5cm ~ 10cm)
- Screen: Digital display
- Charging method: USB charging or battery (18650 Li-ion)
- Install method: nail hook, double-sided adhesive, bracket fixing
- Environment temperature: 50°F ~ 104°F (10ºC ~40ºC) (Recommended : 59°F ~ 95°F (15ºC~35ºC))
- Infrared measuring range: 0°F ~ 122°F (0~ 50ºC)
- Response time: 0.5s
- Input: DC 4.2-5V
- Weight: 380g
- Dimensions: 170* 115* 140mm
- Standby: 72 hours
- Rechargeable Battery required: USB charger (Not included)
- Red Light at: 38°C or 100.4°F
