

4XEM 40W 8-Port USB Desktop Charger Quick Charge(QC)

4XEM Part- 4XSMARTPWR8QC3

4XEM's 40W 8-Port Charger provides 8 USB ports to charge 8 different devices at once. Equipped with an LED display you will be able to keep track of the status of each device's charge simply and in real time. The detachable power cable allows this charger to move where you move. This version of the charger is also equipped with a Quick Charge (QC) port, and a USB Type C port. The QC port is capable of even faster charging by increasing the output voltage to a compatible device. There is also no need to worry about an overcharge as the port and device with only allow what the device is designed for. The advantage of a Type-C port is the smaller shape and the greater ease of plugging in, since it is not reversible. Additionally, Type-C can carry more power which decreases charge times. Get back to full charge fast with this version of 4XEM's 40W 8-Port Charger.
