A woman with long dark hair, wearing a dark blue shirt with a white and pink floral pattern, is smiling and reaching for a knife from a black Dixie Ultra SmartStock dispenser. The dispenser is a tall, narrow unit with multiple compartments, each containing a different type of cutlery. The background is a blurred indoor setting, possibly a kitchen or dining area.

BPI¹ Certified as Compostable

SmartStock[®] Compostable Cutlery is a USDA Certified Biobased Product

¹Compared to SmartStock[®] medium-weight polystyrene cutlery. Renewable materials are plant-based materials that may be grown repeatedly.

²On average and compared to open bins. (Independent research commissioned by Georgia-Pacific.)

³BPI is a trademark of the Biodegradable Products Institute. Complies with or meets ASTM D6400-12 Standard Specification for Labeling of Plastics Designed to be Aerobically Compostable in Municipal or Industrial Facilities.

ULTRA

Compostable

Dixie Ultra® SmartStock® Cutlery Dispensing System

The SmartStock® cutlery system is the ultimate hygienic solution and image booster, available in three convenient sizes. See how it can elevate the guest experience at your restaurant, cafeteria, lunchroom or breakroom.

HELPS ELEVATE HYGIENE

- Enclosed design helps protect cutlery from contamination
- Patrons only touch the cutlery they use
- Helps provide clean and hygienic counter space
- Removable tray is dishwasher safe

HELPS REDUCE USAGE

- One-at-a-time dispensing reduces cutlery usage on average by 29%¹
- Less consumption and waste versus open bins

EASY TO MAINTAIN

- Pre-counted refills cut loading time by 50%²
- Easy inventory management with densely compact refill stacks

SUSTAINABLE

- Cutlery refills are recyclable³
- Saves over 2 lbs. of plastic per case versus individually wrapped cutlery⁴
- Bio-Blend cutlery refills contain 30% renewable content⁵. Compostable cutlery⁶ contains up to 100%.

¹Compared to open bins.

²Independent research commissioned by Georgia Pacific on the SmartStock® Classic Dispenser.

³Product may be recycled if you have access to a recycler that accepts plastic products containing food residue. Such facilities may or may not be available in your area.

⁴Based on complete wrapped Dixie® cutlery.

⁵Renewable material may include starch and/or PLA that come from plants and other naturally renewable materials.

⁶Product is compostable in commercial composting facilities. Such facilities may not exist in your area.

Request a Trial Kit

You can count on Dixie Ultra® for the smart innovations that meet your top foodservice needs. Want to see our SmartStock® cutlery dispensing system in action?

Dixie Ultra® SmartStock® SERIES-W REFILLS		Dixie Ultra® SmartStock® SERIES-B REFILLS	Dixie Ultra® SmartStock® SERIES-O REFILLS		Dixie Ultra® SmartStock® SERIES-F REFILLS	

WHY ARE THERE SERIES?

Dixie Ultra® SmartStock® Cutlery Refills vary in length depending on the refill material. The refill series (W, B, O, and F) ensures you only order refills and dispensers that are compatible.

¹ Product is compostable in commercial compost facilities. Such facilities may not exist in your area.

² Renewable material may include: starch and/or PLA that come from plants and other naturally renewable materials.

³ BPI® is a trademark of the Biodegradable Products Institute. Complies with or meets ASTM D6400-12 Standard Specification for Labeling of Plastics Designed to be Aerobically Composted in Municipal or Industrial Facilities.

SmartStock® dispensers are available for lease only through an authorized distributor.
