

The VisionTek UVC HD60 Capture Card is the ultimate HDMI capture device for content creators, video bloggers, gaming streamers and video enthusiasts. Unleash the power of your mirrorless or DSLR camera as a webcam. Capture 1080p content from a variety of devices onto your computer or stream it instantly without creating lag on your HDMI monitor or screen. The UVC HD60 is quick to setup, easy to use and powerful enough for the most demanding High Definition video content.

KEY FEATURES

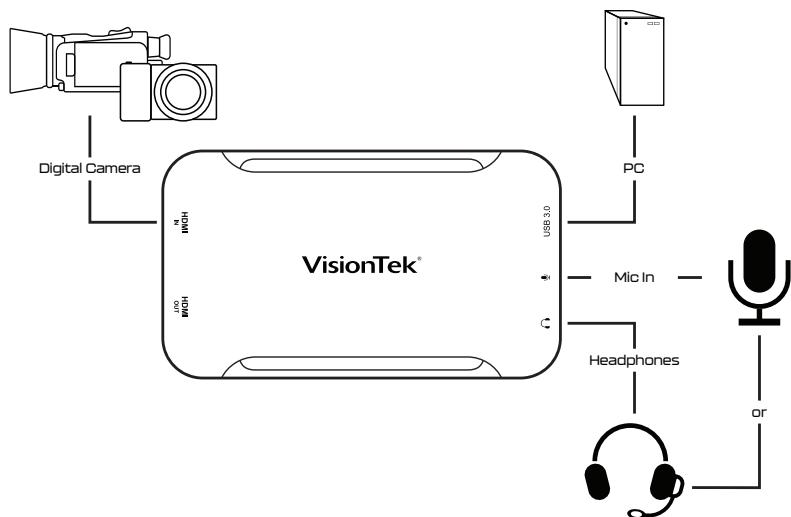

- Use your DSLR as a webcam for optimum streaming, web conferences, or live video content creation. Works with Sony, Canon, Nikon, Fuji, Panasonic and other DSLR and mirrorless cameras. Additional cables may be required.
- Stream your gameplay from the most popular consoles including Playstation, Xbox, Nintendo and more with no lag to your HDMI monitor or screen!
- Connect to your system via USB-C or USB-A - USB bus power means no additional power required. UVC streaming standards allow for maximum compatibility across the most popular third-party applications including OBS, Streamlabs, XSplit, Zoom, Teams and more.
- Input: HDMI 1.4 (Unencrypted) 1080p, 1080i, 720p, 576p, 480p
- Output: HDMI 1.4 Lag-Free Passthrough 1080p, 1080i, 720p, 576p, 480p
- Supported Capture Resolutions: 1080p60, 1080p30, 1080i, 720p60, 720p30, 576p, 576i, 480p
