

Cisco® Webex Room Navigator Wall Mounts

The Cisco Webex Room Navigator control unit provides touch control access to several room controls, such as: controlling Cisco videoconferencing systems, booking a room and controlling amenities within the room. Mounting the Cisco Webex Room Navigator on a wall provides easy access to launch and end video and/or audio conference meetings. In addition, wall mounts help prevent theft and misplaced units.

AVTEQ offers two wall mounting solutions that are compatible with a table-stand unit or a wall-mounted unit the Cisco Webex Room Navigator:

- In-wall mount (CN-WMP)
- Surface wall mount (CN-SM)

The in-wall box offers added security and easy access for users in any room. The in-wall box is designed to offer a flush mounting of the Cisco Webex Room Navigator unit for post or pre-construction.

The surface wall mount is installed directly on the surface of the wall or attached to a 1-gang or 2-gang wall box. Once the mount is installed, the Cisco Webex Room Navigator unit easily slides into the mount and is secured with a set screw at the bottom of the mount.
