

ADD-LEDW

Magnetic LED Light Panel For Enhanced Virtual Communication (White)

Magnetic LED Light Panel

This useful magnetic LED panel turns your tablet device into a home studio. The generous LED light panel helps you look your best while presenting for webinars, YouTube, or whenever you need to speak on-camera. To use, simply attach the magnet to the back of any metal device, or specifically CTA's PAD-PARAW enclosure family. The LED panel tilts 70 degrees front and 90 degrees back, allowing you to compensate for window light, bright overhead fluorescent light, dark shadows, or any situation. This is the perfect solution for corrective lighting that will improve your visibility and appearance.

Features:

- Durable white steel mount with strong magnet
- A power indicator button, to show the battery life remaining
- Battery Operated LED Panel with charging dock.
- Adjustment knobs to control both the brightness and color temperature
- Compatible with CTA's PAD-PARAW enclosures or any metal enclosure/device.

Specifications:

- Dimensions: 9.6in x 6.9in x 0.7in
- Weight: 1.0 lbs

Package contents:

- (1)LED Light installed with magnetic holder
