The Squids® 3183 Carpenter & Laborer Tool Tethering Kit contains tool attachment and tool lanyard solutions specific for tools commonly used by carpenters and laborers working at heights.

RECOMMENDED TOOLS

The kit contains product solutions for tethering claw and sledgehammers, tape measures, speed squares, cordless impact drills/drivers, adjustable wrenches, pry bars, cat's paws, pliers, utility knives, torpedo levels, jab saws, gloves and hard hats.

WHAT'S INCLUDED

The tool attachment solutions in this kit include a tape measure holder, a power tool holder and a variety of Tool Tail™ attachments (wire, elastic and webbing). These solutions create quick and easy attachment points for tool lanyards. The kit also includes several tool lanyard styles (coil, shock-absorbing, single and dual carabiners) with various weight ratings ranging up to 15lbs / 6.8kg to accommodate different tools and attachment/anchor points. This kit also includes self-adhering tape that requires no heat source for application and a glove grabber to keep your gloves, rags or other small accessories close at hand. The tape is meant to be used with the web and elastic Tool Tails™ that come with each kit.

STRAIGHTFORWARD INSTALLATION

Connection points for tool lanyards are not always readily available on tools, which can create a hazardous environment while working at heights. Learn how to tether your tools using the products included in the kit here. Safety lanyards are a part of an overall fall-protection plan to reduce the risk of falling objects and increase workplace safety. When working at heights, it's essential to tether tools, and this tethering kit makes it easy to do by trade. It's all the tool tethering solutions you need for the job, all in one convenient carrying case.
