Height-Adjustable Rolling Medical Workstation Cart with Security Enclosure

Easily adjusts for horizontal and vertical views

Do your job virtually anywhere with CTA Digital's Height-Adjustable Rolling Workstation Cart with Security Enclosure. This cart allows nearly limitless angle-adjustment and smooth rolling mobility, making it a perfect addition to a nurse's station, medical office, classroom, tradeshow, or conference room. Your tablet or device will stay protected by a durable metal security enclosure that features a powerful lock-and-key security system. It attaches easily to the cart's VESA mount either vertically or horizontally. Interior cable routing within the enclosure provides plenty of room to keep cords neatly hidden while charging. The cart's spacious surface area features plenty of room for a laptop, keyboard, or supplies. A dedicated power-strip compartment located underneath the tray ensures that your charge cables stay connected and out of sight. The cart also features an intuitive standing desk style height-adjustment mechanism. Simply grab the two adjustment handles on the cart's underside, and gently pull to achieve your desired height. Four attachable, locking swivel casters provide easy rolling on flat surfaces.
