MODEL NUMBER: TLP410UCUFOAM

Safely charges and powers up to 8 devices, including laptops and tablets, during important workplace meetings and conferences.

Features

Keep Your Team's Devices Powered and Charged During Important Meetings

Workplace meetings involve a variety of devices – laptops, smartphones, tablets – to keep everyone coordinated and up to date with the information necessary to make important decisions. Guaranteeing those devices remain charged and powered is this Safe-IT[™] Conference Power Surge Protector. Rounded to ensure equal access to everyone at the table, this UL-certified surge protector delivers ample power and reliable protection to as many as eight mobile devices at the same time.

NEMA 5-15R Outlets Accept a Wide Range of Electronic Devices

Plug your laptops, projector, printer and other conference-table electronics into four NEMA 5-15R outlets to protect them against dangerous surges, spikes and line noise. Each rotating outlet is located far enough apart from the others to accept bulky transformers without blocking adjacent outlets.

4 USB Ports Provide Plenty of Charging Power

One USB-C and three USB-A ports are available for charging your smartphones, tablets and other USB mobile devices. The USB-A ports share 4.8A of charging power, which is plenty for delivering ample power to demanding devices. The USB-C charging port supplies up to 3A.

Keeps Your Smart Speaker Fully Powered and at Your Disposal

A center device cradle is specially designed to fit an Amazon Echo Dot, Google Nest Mini or other smart speaker that allows access to instant information, external team members or just a little light thinking music. A built-in Micro-USB cable keeps the speaker powered.

1080 Joules Safeguard Your Sensitive Electronics

This surge protector features a surge suppression rating of 1080 joules to defend your sensitive electronic components against even the strongest power surges and spikes. Because residential power outlets have three wires—hot line (H), neutral (N) and ground (G)—the TLP410UCUFOAM protects all three, covering the two protection modes: full normal mode (H-N) and common mode (N-G/H-G).

Filtering EMI/RFI Line Noise Helps Your Equipment Perform Better

This surge protector filters out disruptive electromagnetic and radio frequency interference that can inflict

hardware damage or data loss. This EMI/RFI filtering also helps your connected components perform better and last longer.

Antimicrobial Protection Helps Provide a Safer, Cleaner and Healthier Work Environment

The Safe-IT TLP410UCUFOAM features antimicrobial protection that helps resist the growth of bacteria, viruses, fungi, mold and mildew.

Premium Safety Features Protect Your Valuable Equipment

The on/off switch provides one-touch control over all connected equipment. Automatic shutoff permanently cuts power to outlets if protection circuit is incapacitated, preventing equipment damage and indicating replacement is required. A green LED confirms your connected equipment is protected.

Versatile Surge Protector Provides Flexible Installation Options

A 10-foot cord with NEMA 5-15P plug is long enough to give you plenty of options for placing the unit away from a wall outlet.
