

MOTION PLUS PLATFORM

Introducing the Next Level Racing® Motion Plus Platform, the ultimate immersive motion experience. With thousands of existing motion customers globally for racing and flight, Next Level Racing® Motion Plus Platform offers a new dimension of immersion by introducing heave to the simulation experience. With Market Leading technology, users are able to experience every bump, turn, acceleration, and vibration through their sim chassis. Built to be precise, the Motion Plus Platform performs micromovement from the game every second for the most accurate gameplay feedback while driving or in-flight simulation. The compact design of the Motion Plus Platform allows any home user and commercial centres to easily adapt the unit to their existing frame. With the Next Level Racing® Motion ecosystem in mind, the combination of the Motion Platform V3, Traction Plus Platform, and the Motion Plus Platform can create an unapparelled simulation experience that is at affordable price point.
