

HPE ProLiant DL380 Gen10 Plus 6338 Large 38TB Server with VMware vSphere Distributed Services Engine (P59782-B21)

Overview

Do your virtualized workloads need the agility and scalability of the cloud infrastructure to accelerate business outcomes?

HPE ProLiant with VMware vSphere Distributed Services Engine featuring VMware vSphere® 8, improves apps performance by enabling the data processing unit (DPU) to offload networking services from core processors and securely orchestrate virtual workloads. Unlock the value of your apps and data everywhere by transforming virtual infrastructure with agility of the HPE GreenLake edge-cloud platform and end-to-end protection of HPE security solutions.

Features

Boost Workload Performance through Acceleration with Distributed Infrastructure Services

HPE ProLiant with VMware vSphere Distributed Services Engine features VMware vSphere 8, which supports installation of VMware ESXi™ on DPU and CPU.

Offload VMware NSX® networking and native vSphere networking services from CPU to DPU.

Simplify operations of DPU lifecycle management by utilizing existing tools and workflows.

Consolidate with more workloads per CPU.

Accelerate Business Outcomes Faster with HPE GreenLake for Compute

HPE ProLiant with VMware vSphere Distributed Services Engine enables you to scale up or down on demand to meet unexpected business needs.

Pay-per-use solution with visibility into near-real-time consumption and cost.

Reduce your total cost of ownership and remove the need for expensive overprovisioning.

Get Continuous Protection with Zero Trust from Silicon to Cloud

HPE ProLiant with VMware vSphere Distributed Services Engine is a solution built on the world's most secure industry-standard server.

An uncompromised and trusted supply chain acts as your first line of defense against cyber-attackers.

Protect against ransomware with fast, reliable recovery, backup, and cost-effective archive with HPE data protection solutions.
