Height-Adjustable Rolling Desk with 2 Grommet VESA Mounts

Height-Adjustable Rolling Desk with 2 Grommet VESA Mounts

CTA's Height-Adjustable Rolling Desk with 2 Grommet VESA Mounts adjusts to your work preferences, making it an ideal way to create an office environment anywhere - at work, home, a clinic, pop-up shop, or even a tradeshow booth. This sturdy metal workstation moves smoothly on 4 rolling casters and has the back 2 casters that lock in place with a simple toggle foot switch. An easy-to-operate gas spring foot pedal at the base of the center post lets users adjust the height of the workstation from 30 to 44-inches high, allowing a quick switch between seated and standing positions. The generous 23.5 x 20-inch work surface leaves plenty of space to add two devices of your choice – a monitor, laptop with plate, desktop, or tablet. Use the articulating monitor arm to mount any VESA-compatible device or enclosure. The spring arm adjusts to virtually any angle with 360-degree rotation (for use in either portrait or landscape orientation) and generous tilt capabilities. It holds monitors up to 32 inches and 17.6 lbs., and manages cables with clips along the arms.

Features:

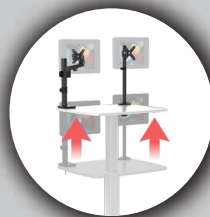

- Sturdy metal height-adjustable rolling workstation
- Two pre-drilled mounting holes with 2 VESA-compatible mounts
- Workstation moves on 4 smooth-rolling and lockable casters
- 23.5 x 20-inch work surface is rated to hold a total weight of up to 33 lbs. (Articulating Monitor Arm holds up to 17.6 lbs.; the Counterbalance Monitor Arm holds up to 15.4 lbs.)
- Easily transforms from sitting to standing workstation with foot pedal at the base of the center post. Center post adjusts from approximately 30-44-inches in height
- Articulating arm joints and placement of the articulating arm on the base pole are all able to be adjusted for customized height.
- 360-degree rotation
- 75x75 and 100x100mm VESA compatible standards
- Articulating Monitor Arm is compatible with monitors up to 27-inches diagonally.
- Articulating arm joints and placement of the articulating arm on the base pole are all able to be adjusted for customized height.
- 360-degree rotation
- Counterbalance Monitor Arm is compatible with monitors up to 27-inches diagonally.
