Premium Security Swan Neck Stand w/ VESA plate (White)

Premium Security Swan Neck Stand w/ VESA plate (White)

This versatile, sturdy swan neck stand provides a secure way to mount a tablet for home offices, hospitality, retail, medical offices and more. Use the sturdy, heavy steel base with all of the included poles to create a useful floor stand. Need a desktop solution? Simply remove the middle and lower poles. A rubber pad at the bottom of the base protects floors or desktop surfaces. The top of the stand features an attractive swan neck curve. Attach any VESA-compatible device case, like CTA's popular Universal Locking Enclosure (PAD-PARAW not included) to the standard 75 x 75 or 100 x 100-millimeter VESA mount for a strong, secure hold. The top rotates and locks in place for use in either portrait or landscape modes. Route all cables through the center post to create a safe, mess-free work space.

Features:

- Easily able to convert into a desk mount by removing center pole
- 75 x 75-millimeter and 100 x 100-millimeter VESA plate easily connects to any VESA-compatible mount
- VESA plate rotates 90-degrees for use in both landscape and portrait orientations
- Interior cable routing system allows neat storage of cables while in use
- Compatible CTA Digital's popular Universal Locking Enclosures (PAD-PARAW) and other VESA-compatible holders and enclosures.
