Vehicle Cup Holder Mount with Tray and Induction Charging Case

CTA Digital's innovative solution for automobiles is both simple and genius: an inductive charging stand that sits securely in a vehicle's cup holder. It's ideal for ride share drivers, delivery personnel, commercial vehicles, and more. Simply plug the base into the car's A/C port. The case contains a back plate that automatically charges the case on the stand. A built-in strap on the rear of the case lets users quickly switch for secure handheld use. This case is perfect for cars, as it's splash-proof, drop-tested, and ready to protect your store's iPad from messes, rough handling, or other incidents. The base contains lots of tilt-adjustment features. To secure, turn the adjustment knob to create a snug fit in virtually any standard drink holder. A center pole connects the base to the case and a rubber-lined tray with a raised edge to hold any accessories. Once on the VESA mount, tablets can be easily adjusted by loosening joint knobs and tightening in place.

Features:

- Wireless charging case
- The water-resistant case features rugged rubber construction with durable impact shielding
- Includes VESA 75 x 75 and 100 x 100-millimeter mounting plates
- Embedded magnet allows for quick mounting to the inductive charging back plate
- Allows full access to headphone jack, speakers, camera, and home button
- Tilt adjustable
- Twist knob at base to release gripping arms
- Round tray with rubber grip lining
- Vehicle adapter fits into the auxiliary power outlets of cars, trucks, delivery, municipal, and construction vehicles
- Supports 36W (12V 3A) with a DC12 output (not compatible with DC5V devices).
- Compatible with iPad 7th- 9th Generation 10.2-inch, iPad Air 3, and iPad Pro 10.5-inch
