ACS-G100

Smart Hardwire Kit Pro with Mini USB, Micro USB, and USB-C Connections

The Smart Hardwire Kit Pro empowers your mygekogear dash cam to record when ignition is off. It helps to collect evidence of hit and run, vandalization etc. The evidence is potentially helpful with insurance claims and help to decrease insurance costs. While installing the hardwire kit to your car, professional hotwiring Installation is highly recommended. This hardwire kit comes with a 10.5ft cable, an LED display to view power voltage and it automatically cuts off power when the car battery power is low. It also comes with mini-USB & micro USB & USB C converters. It works with all myGEKOgear dash cam and mini USB & micro USB & USB C devices, such as dash cam, mirror cam, GPS navigator and radar detector in the market. It is a perfect tool for 24/7 Parking Surveillance.

Compatible 12-24 V Vehicles

This can be installed from compact cars or commercial vehicles

Safety Circuit Protection

Short Circuit/ Over Current/ Over Temperature/ Reverse Connection Protection

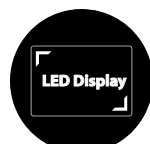

Adjustable Delay Time and Protection Voltage

The user can reset the Delay time and low voltage protection value according to their own needs including time or voltage. This can more accurately protect the car battery.

24 Hours Parking Surveillance

The vehicle hard-wire kit connects a dash cam device to a car battery or fuse box when the car ignition is off. This allows dash cam to record evidence of potential hit and run and vandalization in public space.

LED Display

Smart hardwire kit pro comes with LED display which allows users to setup/view power voltage and time. It will automatically cut off power when the car battery power is low or after a certain time

Compatible with myGEKOgear Dash Cams

Compatible with all of myGEKOgear line up of dash cams from 1080P to 4k resolution.

Specifications

Connector: Mini, Micro, & USB-C

Input Voltage: 12V-24V

Output Voltage: 4.8V-5.3V

Output Current: 3.8-4.2A

Voltage Protection: 11.6/ 11.7/ 11.8/ 11.9/ 12/ 12.1/ 12.2v/ 23.2/ 23.4/ 23.6/ 23.8/ 24V

Time Protection: 2/ 4/ 8/ 12/ 24 Hours HHH (Always On)

Cable Length: 11ft

Unit Weight: 0.22 lbs

Unit Dimensions: 2.8" x 1.6" x 0.7"
