Built-in Mic

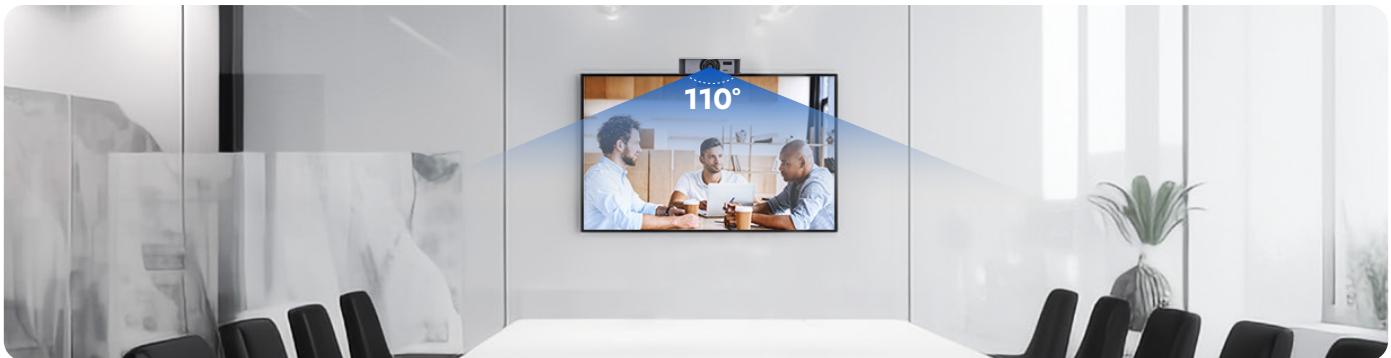

RC16 is a high-performance USB camera designed specifically for small to medium-sized meeting rooms and personal office environments. It is equipped with a next-generation UHD CMOS image sensor, providing 4K ultra-high-definition resolution images. In addition, it features automatic focus, Auto framing, Humanoid tracking algorithms, and audio processing capabilities, delivering an exceptional conference audiovisual experience for users.

4K Ultra-High Definition

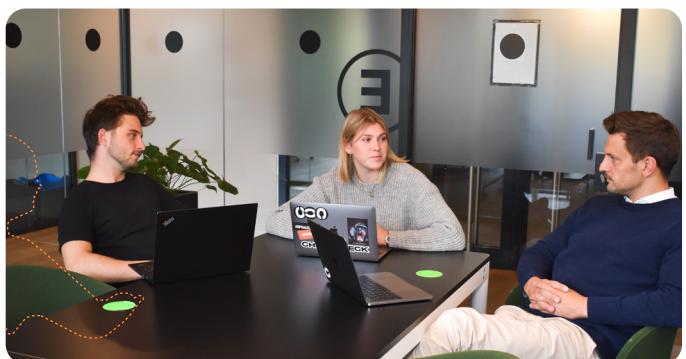

It utilizes a 1/2.7-inch UHD CMOS sensor with an effective pixel count of 8.29 million. It supports a maximum 4K@30fps image encoding output, delivering higher picture resolution and rich details.

110° Wide Angle

Equipped with a 110° ultra-wide-angle lens, it captures a wider range and minimizes image distortion. With Auto Framing technology, it can automatically detect people within the field of view and adjust the picture angle accordingly.

Auto Framing with AI Technology

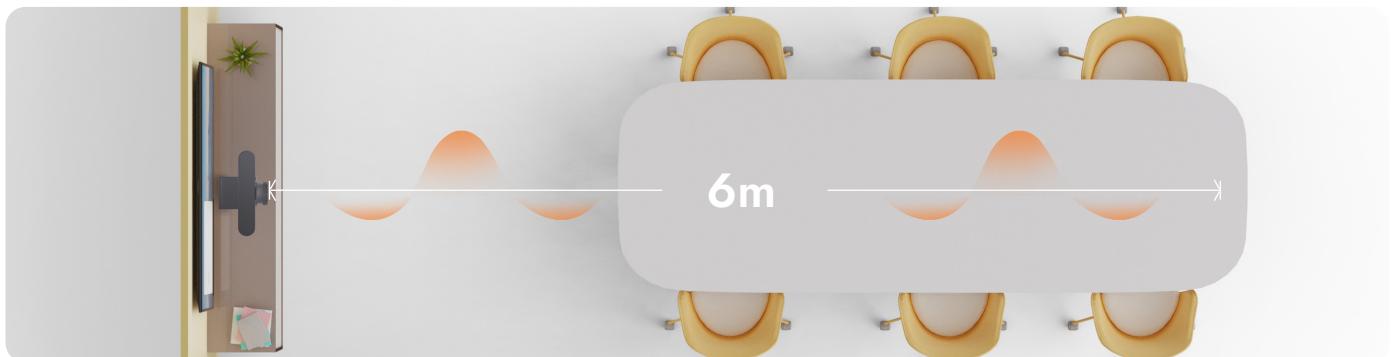

The camera integrates AI algorithms and facial recognition technology, automatically identifying changes in seating arrangement in the meeting room and adjusting the camera's field of view for optimal framing. It can also track new participants as they enter the frame.

Humanoid Tracking with AI Technology

With the built-in NNE hardware unit and deep learning technology, it achieves smooth person tracking by extracting target features, regardless of the direction the person's face is facing.

6-meter Clear Audio Pickup

Featuring a built-in beamforming microphone array and unique noise suppression and automatic gain algorithms, it ensures clear audio pickup within a range of 6 meters, enhancing speech clarity.

One-Click Convenience

USB 3.0 interface

With the exquisite infrared remote control and exclusive software, users can easily activate features such as automatic framing and person tracking with a single click. It also allows convenient settings for presets, electronic pan-tilt-zoom (ePTZ), image parameters, providing a user-friendly operating experience.

Independent Research and Development

Localized Audio and Video Technology

For 16 years since its establishment, Rocware has adhered to independent research, development and innovation, continuously invested in improvement, and fully mastered the core algorithm technology in the field of audio and video. The entire product line is independently controllable, safe, reliable, and highly competitive.

Own Factory

Complete Self-owned Supply Chain

Rocware has its own factory, it can independently complete part of the mold design and manufacturing, CNC processing, plastic injection molding and other basic material production. It also has an internationally advanced high-speed double-sided PCB SMT line, precision equipment assembly and testing line, to ensure product quality and stable supply.

800-416-1895

Well-developed After-sales Support System

Rocware has set up five major marketing centers around the world, with more than 30 after-sales service outlets. It provides 7*12 hour customer service telephone support, as well as various online and offline technical support and after-sales services to comprehensively ensure the user experience.
